Board of Trustees
Teachers' Retirement System of the State of Illinois
2815 West Washington Street
Springfield, Illinois 62702

Dear Board Members:

We are pleased to submit the following report intended to be used for satisfying certain reporting requirements of Governmental Accounting Standards Board (GASB) Statement Nos. 67 and 68 as of June 30, 2021.

This report was prepared in accordance with generally accepted actuarial principles and practices. The census and financial information on which our calculations were based was supplied by TRS staff. That assistance is gratefully acknowledged. The actuarial calculations were completed under the supervision of Matthew Strom, FSA, MAAA, Enrolled Actuary and Tanya Dybal, FSA, MAAA, Enrolled Actuary.

The measurements shown in this actuarial valuation may not be applicable for other purposes. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period); and changes in plan provisions or applicable law.

An actuarial valuation is a measurement at a specific date – it is not a prediction of a plan's future financial condition. We have not been retained to perform an analysis of the potential range of financial measurements, except where otherwise noted.

We are members of the American Academy of Actuaries and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. To the best of our knowledge, the information supplied in the actuarial valuation is complete and accurate. Further, in our opinion, the assumptions as approved by the Board are reasonably related to the experience of and expectations for the System.

Board of Trustees
Teachers' Retirement System of the State of Illinois
December 22, 2021

Section 1: Actuarial Valuation Summary

Purpose and Basis

This report has been prepared by Segal to present certain disclosure information required by Governmental Accounting Standards Board (GASB) Statement Nos. 67 and 68 as of June 30, 2021. This valuation is based on:

- The benefit provisions of the System, as administered by the Board;
- The characteristics of covered active members, inactive members, and retirees and beneficiaries as of the prior valuation date;
- The assets of the System as of June 30, 2021;
- Economic assumptions regarding future salary increases and investment earnings; and
- Other actuarial assumptions, regarding employee terminations, retirement, death, etc.

Highlights of the Valuation

The following key findings were the result of this actuarial valuation:

- The following assumption changes were approved by the Board on August 12, 2021, and are reflected in this valuation:
 - The inflation assumption was lowered from 2.50% to 2.25%.
 - The rates of individual salary increase were decreased based on plan experience.
 - The new entrant pay increase assumption was changed to equal the inflation assumption.
 - The average COLA and rate of increase in the pensionable salary cap applicable to Tier 2 members was decreased based on the change in the inflation assumption.
 - The percent of retirees assumed to receive severance pay and the average severance payment amount were decreased.
 - The healthy, disabled, and beneficiary post-retirement and pre-retirement mortality assumption was updated to use the recently published PubT-2010 Mortality Tables with adjusted rate multipliers at various ages for males and females to better reflect plan experience.
 - The mortality improvement scale was updated from Scale MP-2017 to Scale MP-2020.
 - The retirement rates for active Tier 1 members were adjusted based on plan experience. The previous service groups of 30 to 31 years of service and 32 to 33 years of service were updated to 30 to 33 years of service.

Section 1: Actuarial Valuation Summary

Highlights of the Valuation *continued*

- The termination rates were decreased based on plan experience.
- The disability rates were decreased based on plan experience.
- The sick leave service credit rates were adjusted based on plan experience.
- The optional service purchase rates were adjusted based on plan experience.
- The future service accrual rates were increased based on plan experience.
- The Automatic Annual Increase buyout participation rate was increased for eligible retiring Tier 1 members based on plan experience.
- The Inactive Vested buyout participation rate was decreased for eligible inactive vested members based on plan experience.
- The period which buyouts are assumed to be paid was extended from fiscal year 2022 to fiscal year 2024.
- It is important to note that the GASB rules only redefine pension liability and expense for financial reporting purposes, and do not apply to contribution amounts for actual pension funding purposes. The funding policy adopted by the Board of Trustees, referred to as “Board-Adopted Actuarial Funding Policy,” is described on pages 16 and 17 of our Actuarial Valuation Report as of June 30, 2021.
- When measuring net pension liability for GASB purposes, the Entry Age cost method is used to determine the Total Pension Liability (TPL) of the System. The Projected Unit Credit cost method is used to determine the contribution required by the Illinois Pension Code. This means that the TPL measure for financial reporting shown in this report will differ from the Actuarial Accrued Liability (AAL) measure for funding under the Illinois Pension Code.
- The Net Pension Liability (NPL) is equal to the difference between the TPL and the Plan’s fiduciary net position. The NPL decreased from \$86.2 billion as of June 30, 2020, to \$78.0 billion as of June 30, 2021, primarily as a result of favorable investment experience on a fair value of assets basis for the fiscal year ended June 30, 2021. Changes in these values during the fiscal year ending June 30, 2021, can be found in *Exhibit 5*.
- The discount rate used to determine the TPL and NPL was 7.00% as of June 30, 2021, and June 30, 2020. The detailed calculations used in this derivation are shown in *Exhibit 9* of our Actuarial Valuation Report as of June 30, 2021.

Section 1: Actuarial Valuation Summary

Summary of Key Valuation Results

		2021	2020
Disclosure elements for fiscal year ending June 30:	• Service cost • Total pension liability (TPL) • Plan fiduciary net position • Net pension liability • Plan fiduciary net position as a percentage of TPL	\$2,032,149,463 142,223,798,748 64,212,505,020 78,011,293,728 45.1%	\$1,991,622,987 138,531,733,887 52,316,477,771 86,215,256,116 37.8%
Pension expense for fiscal year ending June 30:	• Total pension expense • TRS employer contributions for TRS employees¹ • Employer specific liability contributions • Net pension expense to allocate	\$5,327,520,916 (336,073) (35,921,535) 5,291,263,308	\$8,896,713,718 170,737 (31,374,271) 8,865,510,184
Demographic data used for the valuation as of June 30²:	• Number of retirees and beneficiaries • Number of inactive members • Number of active members	126,594 144,574 162,949	124,791 141,271 163,075
Key assumptions:	• Long-term expected rate of return • Municipal bond index³ • Single equivalent discount rate • Inflation rate • Projected salary increases	7.00% 2.16% 7.00% 2.25% 3.50% to 8.50% varying by service	7.00% 2.21% 7.00% 2.50% 4.00% to 9.50% varying by service

¹ Includes contributions appropriated but not received and other miscellaneous adjustments to match final financial statements as of June 30, 2021

² Member data used in the valuation is as of the prior valuation date

³ Bond Buyer's 20-Bond GO index

Section 1: Actuarial Valuation Summary

Important Information about Actuarial Valuations

In order to prepare a valuation, Segal relies on a number of input items. These include:

Plan of benefits	Plan provisions define the rules that will be used to determine benefit payments, and those rules, or the interpretation of them, may change over time. It is important to keep Segal informed with respect to plan provisions and administrative procedures, and to review the plan summary included in our funding valuation report to confirm that Segal has correctly interpreted the plan of benefits.
Participant data	An actuarial valuation for a plan is based on data provided to the actuary by TRS. Segal does not audit such data for completeness or accuracy, other than reviewing it for obvious inconsistencies compared to prior data and other information that appears unreasonable. It is important for Segal to receive the best possible data and to be informed about any known incomplete or inaccurate data.
Assets	The valuation is based on the market value of assets as of the valuation date, as provided by TRS.
Actuarial assumptions	In preparing an actuarial valuation, Segal projects the benefits to be paid to existing plan participants for the rest of their lives and the lives of their beneficiaries. This projection requires actuarial assumptions as to the probability of death, disability, withdrawal, and retirement of each participant for each year. In addition, the benefits projected to be paid for each of those events in each future year reflect actuarial assumptions as to salary increases and cost-of-living adjustments. The projected benefits are then discounted to a present value based on the assumed rate of return that is expected to be achieved on the plan's assets. There is a reasonable range for each assumption used in the projection and the results may vary materially based on which assumptions are selected. It is important for any user of an actuarial valuation to understand this concept. Actuarial assumptions are periodically reviewed to ensure that future valuations reflect emerging plan experience. While future changes in actuarial assumptions may have a significant impact on the reported results, that does not mean that the previous assumptions were unreasonable.
Models	Segal valuation results are based on proprietary actuarial modeling software. The actuarial valuation models generate a comprehensive set of liability and cost calculations that are presented to meet regulatory, legislative and client requirements. Deterministic cost projections are based on a proprietary forecasting model. Our Actuarial Technology and Systems unit, comprised of both actuaries and programmers, is responsible for the initial development and maintenance of these models. The models have a modular structure that allows for a high degree of accuracy, flexibility and user control. The client team programs the assumptions and the plan provisions, validates the models, and reviews test lives and results, under the supervision of the responsible actuary. The blended discount rate used for calculating total pension liability is based on a model developed by our Actuarial Technology and Systems unit. The model allows the client team, under the supervision of the responsible actuary, control over the entry of future expected contribution income, benefit payments, and administrative expenses. The projection of fiduciary net position and the discounting of benefits is part of the model.

Section 1: Actuarial Valuation Summary

Important Information about Actuarial Valuations *continued*

The user of Segal's actuarial valuation (or other actuarial calculations) should keep the following in mind:

The valuation is prepared at the request of the TRS Board to assist the sponsors of the System in preparing items related to the pension plan in their financial reports. Segal is not responsible for the use or misuse of its report, particularly by any other party.

An actuarial valuation is a measurement of the plan's assets and liabilities at a specific date. Accordingly, except where otherwise noted, Segal did not perform an analysis of the potential range of future financial measures. The actual long-term cost of the plan will be determined by the actual benefits and expenses paid and the actual investment experience of the plan.

If the TRS Board is aware of any event or trend that was not considered in this valuation that may materially change the results of the valuation, Segal should be advised, so that we can evaluate it.

Segal does not provide investment, legal, accounting, or tax advice. Segal's valuation is based on our understanding of applicable guidance in these areas and of the plan's provisions, but they may be subject to alternative interpretations. The Board should look to their other advisors for expertise in these areas.

As Segal has no discretionary authority with respect to the management or assets of the System, it is not a fiduciary in its capacity as actuaries and consultants with respect to the System.

Section 2: GASB 67 and 68 Information

Exhibit 1 – Membership Data¹

	Valuation as of June 30,	
	2021	2020
Retirees and beneficiaries	126,594	124,791
Inactive members	144,574	141,271
Active members		
Tier I	112,214	116,261
Tier II	<u>50,735</u>	<u>46,814</u>
Total active members	162,949	163,075
Total membership	434,117	429,137

¹ Member data used in the valuation is as of the prior valuation date.

Section 2: GASB 67 and 68 Information

Exhibit 2 – Net Pension Liability

The components of the net pension liability of the Teachers' Retirement System of the State of Illinois are as follows:

	June 30, 2021	June 30, 2020
Total pension liability	\$142,223,798,748	\$138,531,733,887
Plan fiduciary net position	<u>(64,212,505,020)</u>	<u>(52,316,477,771)</u>
Net pension liability	\$78,011,293,728	\$86,215,256,116
Plan fiduciary net position as a percentage of the total pension liability	45.1%	37.8%

The Net Pension Liability for the plan was measured as of June 30, 2021 and 2020. Plan Fiduciary Net Position was valued as of the measurement dates and the Total Pension Liability was determined from actuarial valuations as of June 30, 2021 and 2020, respectively.

Actuarial Assumptions: The total pension liability was determined by an actuarial valuation as of June 30, 2021, using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	2.25%
Salary increases	8.50% at one year of service to 3.50% at 20 and more years of service
Investment rate of return	7.00%
Cost-of-living adjustments	Tier I: 3% compounded Tier II: 1.125% not compounded

The assumed mortality rates are based on the Society of Actuaries PubT-2010 mortality tables, adjusted for TRS experience, with generational improvement based on Scale MP-2020.

The actuarial assumptions used were based on the results of an experience study dated August 12, 2021.

Section 2: GASB 67 and 68 Information

Exhibit 3 – Target Asset Allocation

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of June 30, 2021, are summarized in the following table:

Asset Class	Target Allocation ¹	Expected Arithmetic Returns over 20 Years ²
US Equities Large Cap	16.70%	6.20%
US Equities Small/Mid Cap	2.20	7.38
International Equities Developed	10.60	6.93
Emerging Markets Equities	4.50	9.17
US Bonds Core	3.00	1.58
International Debt Developed	1.00	0.37
International Debt Emerging	4.00	4.38
Cash Equivalents	2.00	0.12
TIPS	1.00	0.78
Real Estate	16.00	5.75
Hedge Funds (Absolute Return)	10.00	3.94
Infrastructure	4.00	6.29
Private Equity	15.00	10.38
Private Debt	10.00	6.47
Total	100.0%	

¹ Breakout determined with assistance from TRS staff

² Based on the 2020 Horizon Survey of Capital Market Assumptions

Discount rate: The long-term expected rate of return on pension plan investments is 7.00%. The high quality tax-exempt general obligation municipal bond rate (20-Bond GO Index) as of the closest date prior to the valuation date of June 30, 2021, is 2.16%, as published by The Bond Buyer.

The discount rate used to measure the total pension liability was 7.00% as of June 30, 2021. The projection of cash flows used to determine the discount rate assumed plan member and employer contributions will be made at rates equal to those based on the June 30, 2021, Actuarial Valuation Report. For this purpose, only employer contributions that are intended to fund benefits of current plan members and their beneficiaries are included. Projected employer contributions that are intended to fund the service costs of future plan members and their beneficiaries, as well as projected contributions from future plan members, are not included. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments for current plan members as of June 30, 2021. Therefore, the long-term expected rate of return was applied to all periods of projected benefit payments to determine the total pension liability as of June 30, 2021.

Section 2: GASB 67 and 68 Information

Exhibit 4 – Discount Rate Sensitivity

Sensitivity of the net pension liability to changes in the discount rate: The following presents the net pension liability of the System, calculated using the discount rate of 7.00%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.00%) or 1-percentage-point higher (8.00%) than the current rate:

	1% Decrease (6.00%)	Current Discount Rate (7.00%)	1% Increase (8.00%)
Net pension liability as of June 30, 2017	\$93,865,095,009	\$76,398,141,920	\$62,091,251,142
Net pension liability as of June 30, 2018	95,591,974,194	77,944,836,602	63,733,576,730
Net pension liability as of June 30, 2019	99,066,519,428	81,108,165,261	66,342,829,110
Net pension liability as of June 30, 2020	104,649,618,237	86,215,256,116	71,038,443,785
Net pension liability as of June 30, 2021	96,615,373,673	78,011,293,728	62,558,129,092

Section 2: GASB 67 and 68 Information

Exhibit 5 – Schedule of Changes in Net Pension Liability

	Fiscal Year Ended June 30,

¹ Reflects implementation of the Board-Adopted Funding Policy

Section 3: Additional Information for GASB 68

Exhibit A – Reconciliation of Collective Net Pension Liability

Changes in the collective net pension liability from the beginning of the year to the end of the year arise from the net difference between changes in the total pension liability and plan fiduciary net position that occurred during the year. Changes in net pension liability will be recognized immediately as pension expense, or reported as deferred outflows of resources related to pensions or deferred inflows of resources related to pensions, depending on the nature of the change.

Differences between actual and expected investment-related experience are recognized over a closed five-year period. Differences between actual and expected non-investment-related experience and changes of assumptions are recognized over the average of the expected remaining service lives of all members who are provided with pensions through the pension plan (active employees and inactive employees). The amounts below that are not included in pension expense for the current year are included in deferred outflows of resources or deferred inflows of resources related to pensions.

	Increase/(Decrease) For Fiscal Year Ending June 30, 2021		
	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability (a) – (b)
Balances at beginning of year	\$138,531,733,887	\$52,316,477,771	\$86,215,256,116
Changes for the year			
Service cost	2,032,149,463		2,032,149,463
Interest	9,580,886,840		9,580,886,840
Differences between expected and actual experience	(370,469,646)		(370,469,646)
Contributions – employer		97,594,081	(97,594,081)
Contributions – nonemployer contributing entity		5,140,648,356	(5,140,648,356)
Contributions – member		1,023,531,951	(1,023,531,951)
Net investment income		13,046,153,685	(13,046,153,685)
Benefit payments, including refunds of employee contributions	(7,388,142,712)	(7,388,142,712)	0
Administrative expense		(23,758,112)	23,758,112
Change of assumptions	(162,359,084)		(162,359,084)
Change of benefit terms	0		0
Net changes	3,692,064,861	11,896,027,249	(8,203,962,388)
Balances at end of year	<u>\$142,223,798,748</u>	<u>\$ 64,212,505,020</u>	<u>\$78,011,293,728</u>

Section 3: Additional Information for GASB 68

Exhibit A – Reconciliation of Collective Net Pension Liability *continued*

As shown on the prior page, during the plan year that ended June 30, 2021, the change in net pension liability due to differences between expected and actual demographic experience is a decrease of \$370,469,646 and the change in net pension liability due to changes in actuarial assumptions is a decrease of \$162,359,084. The average expected remaining service lives of all members is 5.56 years, determined as of June 30, 2020 (the beginning of the measurement period ended June 30, 2021). Therefore, of the \$370,469,646 demographic gain, \$66,631,231 is recognized in pension expense in the current year and \$303,838,415 is reflected as a deferred inflow of resources related to pensions. Of the \$162,359,084 decrease in net pension liability due to actuarial assumptions, \$29,201,274 is recognized in pension expense in the current year and \$133,157,810 is reflected as a deferred inflow of resources related to pensions.

Based on the assumed investment return of 7.00%, the expected net investment income for the year was \$3,621,899,019. As shown on the prior page, the actual net investment income for the year was \$13,046,153,685. The difference between actual and expected investment experience is a decrease in net pension liability of \$9,424,254,666, which is recognized over a 5-year period. Of this amount, \$1,884,850,933 is recognized in pension expense in the current year and \$7,539,403,733 is reflected as a deferred inflow of resources related to pensions.

Section 3: Additional Information for GASB 68

Exhibit C – Collective Pension Expense

The individual components of collective pension expense, which totaled \$5,327,520,916 for the fiscal year that ended June 30, 2021, are shown below.

Annual pension expense for the year can also be viewed as the change in net pension liability, plus employer contributions for the year, less the change in outstanding balances of deferred outflows and deferred inflows of resources from the end of the prior fiscal year to end of the current fiscal year. From Exhibit A, the change in net pension liability during the year was -\$8,203,962,388 and non-member contributions were \$5,238,242,437. From Exhibit B, the net value of deferred outflows and deferred inflows of resources as of the end of the current fiscal year is -\$5,457,802,271 compared to the net value as of the end of the prior fiscal of \$2,835,438,596 for a change of -\$8,293,240,867. Therefore, the pension expense for the fiscal year that ended June 30, 2021, is $-\$8,203,962,388 + \$5,238,242,437 + \$8,293,240,867$, or \$5,327,520,916.

	Fiscal Year Ended June 30,	
	2021	2020
Components of Pension Expense

Difference between projected and actual earnings on pension plan investments	(1,617,254,551)	964,181,831
Change of benefit terms	-	-
Total pension expense	\$5,327,520,916	\$8,896,713,718
TRS employer contributions for TRS employees ¹	(336,073)	170,737
Employer specific liability contributions	(35,921,535)	(31,374,271)
Net pension expense to allocate	<u>\$5,291,263,308</u>	<u>\$8,865,510,184</u>

¹ Includes contributions appropriated but not received and other miscellaneous adjustments to match final financial statements as of June 30, 2021 and June 30, 2020, respectively.

Section 3: Additional Information for GASB 68

Exhibit C – Collective Pension Expense *continued*

Accounting and Allocation Basis

TRS is classified as a cost-sharing multiple-employer defined benefit pension plan with a special funding situation for GASB accounting purposes. As specified in GASB 68, employers that participate in TRS and the State of Illinois as a non-employer contributing entity are required to recognize their proportionate share of the collective pension amounts for all benefits provided through the System. Pension amounts to be recognized by employers and the State of Illinois include the net pension liability, deferred outflows of resources related to pensions, deferred inflows of resources related to pensions, and pension expense. In addition, the effects of (1) a change in the proportionate share of the collective net pension liability and (2) differences during the measurement period between the employer's contributions and its proportionate share of the total of contributions from employers included in the collective net pension liability are required to be determined and recognized.

The allocation of the collective pension amounts is based on the proportionate share of includable contributions to TRS for the measurement year. Includable employer contributions are the 0.58% of salary contributions for the 2.2% formula. The entire State contribution is includable. Employer contributions not included in the allocation are contributions for ERO, excess salary, excess sick leave, salaries above the governor's salary, and "federal funds" contributions. These non-includable contributions are treated as contributions for employer specific liabilities. Employers with specific liabilities are allocated a portion of the pension expense equal to their non-includable contributions. Collective pension expense, net of employer specific amounts, is allocated to the employers and State based on includable contributions.

The "federal funds" contributions are excludable contributions effective starting in fiscal year 2018 due to a change in the Illinois Pension Code requiring the "federal funds" contributions be based on the employer normal cost rate. Any change in proportionate share resulting from this statutory change for individual employers will be recognized and amortized over the remaining service lives of all members beginning in fiscal year 2018.

The System's auditor has determined that TRS as an employer is not subject to an allocation of the System's NPL and collective pension expense. The total pension expense before and after adjustments for TRS as an employer and for employer specific amounts are shown on the prior page.

The net effect of the change on an employer's proportionate share of the collective net pension liability and collective deferred outflows of resources and deferred inflows of resources is recognized over the average of the expected remaining service lives of all members who are provided with pensions through TRS, in accordance with paragraph 54 of GASB 68. The average expected remaining service as of June 30, 2020 (the beginning of the measurement period) is 5.56. Additional detail related to the calculation of this amount is shown on page 18.

Section 3: Additional Information for GASB 68

Exhibit C – Collective Pension Expense *continued*

Allocation of State Amounts to Employers

Since the State of Illinois is a non-employer contributing entity, GASB 68 requires each employer to report a portion of the State's share of net pension liability and pension expense. The employer's portion of the State's share is for disclosure only and does not impact the employer's balance sheet or income statement.

The underlying basis for allocating the State's net pension liability and pension expense to each employer is payroll. Absent the explicit reporting of payroll by employer, the allocation has been determined by the employer's proportionate share of 0.58% contributions, which should produce the same allocation results as payroll.

Employer and State Contributions

We relied on contribution amounts by employer as provided by TRS. Contributions TRS received for the fiscal year ended June 30, 2021, were used for allocating the collective pension expense and year-end net pension liability for the measurement year ending June 30, 2021. Employers are identified uniquely by their TRS employer codes.

Exhibits D, E, and F that follow show the proportionate share information for employers of TRS for the fiscal year ending June 30, 2021.
