The experience and dedication you deserve

March 13, 2017

Teachers' Retirement Board
State of Montana
1500 Sixth Avenue
Helena, MT 59620-0139

Members of the Board:

Presented in this report is information to assist the Teachers' Retirement System (System) in providing necessary Governmental Accounting Standards Board (GASB) Statement No. 68 disclosure information to participating employers. This report has been prepared as of June 30, 2016 (the measurement date) to assist the System in meeting the requirements of GASB Statement No. 68 and to identify the information to be provided by the actuary, Cavanaugh Macdonald Consulting, LLC. GASB Statement No. 68 establishes accounting and financial reporting requirements for governmental employers that provide pension benefits to their employees through a trust.

The annual actuarial valuation used as a basis for much of the information presented in this report was performed as of June 30, 2016 (The Measurement Date). The valuation was based upon data, furnished by System staff, concerning active, inactive and retired members along with pertinent financial information.

To the best of our knowledge, this report is complete and accurate. The necessary calculations were performed by, and under the supervision of, independent actuaries who are members of the American Academy of Actuaries with experience in performing valuations for public retirement systems.

The calculations were prepared in accordance with the principles of practice prescribed by the Actuarial Standards Board, and, in our opinion, meet the requirements of GASB 68.

Phone (678) 388-1700 • Fax (678) 388-1730

www.CavMacConsulting.com

Offices in Englewood, CO • Kennesaw, GA • Bellevue, NE

The actuarial calculations were performed by qualified actuaries according to generally accepted actuarial procedures and methods. The calculations are based on the current provisions of the System, and on actuarial assumptions that are, individually and in the aggregate, internally consistent and reasonably based on the actual experience of the System. In addition, the calculations were completed in compliance with the laws governing the System. The undersigned are members of the American Academy of Actuaries and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

Respectfully submitted,

A handwritten signature in blue ink, appearing to read 'Edward Macdonald', with a stylized flourish at the end.

Edward A. Macdonald, ASA, FCA, MAAA
President

A handwritten signature in blue ink, appearing to read 'Todd B. Green', with a horizontal line extending to the right.

Todd B. Green, ASA, FCA, MAAA
Principal and Consulting Actuary

REQUIRED INFORMATION FOR THE
TEACHERS' RETIREMENT SYSTEM
PREPARED AS OF JUNE 30, 2016**

SECTION I – SUMMARY OF COLLECTIVE AMOUNTS

Valuation Date (VD):	June 30, 2016
Measurement Date (MD):	June 30, 2016
Reporting Date (RD):	June 30, 2017
Single Equivalent Interest Rate (SEIR):	
Long-Term Expected Rate of Return	7.75%
Municipal Bond Index Rate	N/A
Fiscal Year in which Plan's Fiduciary Net Position is projected to be depleted from future benefit payments for current members	N/A
Single Equivalent Interest Rate	7.75%
Net Pension Liability (Fiscal Year Ended 2015):	
Total Pension Liability (TPL)	\$ 5,351,391,599
Fiduciary Net Position (FNP)	3,708,385,838
Net Pension Liability (NPL = TPL – FNP)	\$ 1,643,005,761
FNP as a percentage of TPL	69.30%
Net Pension Liability (Fiscal Year Ended 2016):	
Total Pension Liability (TPL)	\$ 5,483,673,777
Fiduciary Net Position (FNP)	3,656,830,798
Net Pension Liability (NPL = TPL – FNP)	\$ 1,826,842,979
FNP as a percentage of TPL	66.69%
Pension Expense (PE):	\$ 141,234,051
Deferred Outflows of Resources:	\$ 139,033,561
Deferred Inflows of Resources:	\$ 15,365,660

SECTION II – INTRODUCTION

This report, prepared as of June 30, 2016 (the Measurement Date), presents information to assist the System in providing the required information under GASB 68 to the participating employers of the Teachers' Retirement System (TRS). Much of the material provided in this report is based on the results of the GASB 67 report for the System, which was issued on November 1, 2016. See that report for more information on the member data, actuarial assumptions and methods used in developing the GASB 67 results.

GASB 68 creates disclosure and reporting requirements that may or may not be consistent with the basis used for funding the Plan. GASB 68 requires each of the participating employers and non-employer contributing entities to include a proportionate share of a Net Pension Liability (NPL) and to recognize a proportionate share of a Pension Expense (PE) in their financial statements.

The NPL shown in the GASB Statement No. 67 Report for the System as of June 30, 2016 and submitted November 1, 2016 is the collective NPL used for purposes of GASB 68. Please refer to that report for the derivation of the collective NPL.

Pension Expense includes amounts for service cost (the normal cost under the Entry Age Normal actuarial cost method for the year), interest on the Total Pension Liability (TPL), changes in benefit structure, amortization of increases/decreases in liability due to actuarial experience and actuarial assumption changes, and amortization of investment gains/losses. The actuarial experience and assumption change impacts are amortized over the average expected remaining service life of the Plan membership as of the Measurement Date, and investment gains/losses are amortized over five years. The development of the collective PE is shown in Section V.

The System receives a portion of the total required statutory contributions directly from the State for all employers. The employers are considered to be in a special funding situation as defined by GASB 68 and the State is treated as a non-employer contributing entity in TRS. The System receives 2.49% from the State's general fund for School Districts and Other Employers. The System also receives 0.11% from the State's general fund for State and University Employers. Finally, the State is also required to contribute \$25 million in perpetuity payable July 1st of each year.

The NPL has been allocated based on actual contributions made to the System during the measurement period to determine the proportionate share to each participating employer. Schedule D of the report shows the total amount of the employer contributions for the year ending June 30, 2016 from each participating employer, and the amount of the contributions from the State.

The unrecognized portions of each year's experience, assumption changes and investment gains/losses are used to develop deferred inflows and outflows, which also must be included in the employer's financial statements. The development of the collective deferred inflows and outflows is shown in Section III.

The sections that follow provide the results of all the required aggregate calculations, present in the order laid out in GASB 68 for note disclosure and Required Supplementary Information (RSI). The System will provide the calculation of the proportional share of the NPL, Pension Expense, and Deferred Inflows and Outflows for each participating employer or non-employer contributing entity.

Section I of this report is a summary of the principal results of the collective amounts under GASB 68. Section III and Section IV provides the results of all the necessary calculations, presented in the order laid out in GASB 68 for note disclosure and Required Supplementary Information (RSI).

SECTION III – FINANCIAL STATEMENT NOTES

The material presented herein will follow the order presented in GASB 68. Paragraph numbers are provided for ease of reference. Amounts are shown in aggregate.

Paragraph 74: The information required to be prepared by the System and/or the individual employer.

Paragraph 75: The information required to be prepared by the individual employer.

Paragraphs 76(a) - (b): The information required is to be supplied by the System.

Paragraph 77: This paragraph requires information regarding the actuarial assumptions used to measure the TPL. The actuarial assumptions utilized in developing the TPL are outlined in Schedule B. The total pension liability was determined by an actuarial valuation as of July 1, 2016, using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3.25 percent
Salary increases	4.00 - 8.51% percent, including inflation for Non-University Member; 5.00 Percent for University Members including inflation
Investment rate of return	7.75 percent, net of pension plan investment expense, including inflation

Mortality

Mortality among contributing members, service retired members, and beneficiaries:

For Males: 1992 Base Rates from the RP 2000 Healthy Annuitant Mortality Table for ages 50 and above and 1992 Base Rates from the RP 2000 Combined Healthy Annuitant Mortality Table for ages below 50, set back four years, with mortality improvements projected by Scale BB to 2018.

For Females: 1992 Base Rates from the RP 2000 Healthy Annuitant Mortality Table for ages 50 and above and 1992 Base Rates from the RP 2000 Combined Healthy Annuitant Mortality Table for ages below 50, set back two years, with mortality improvements projected by Scale BB to 2018.

Mortality among disabled members:

For Males: RP 2000 Disabled Mortality Table for Males, set forward one year, with mortality improvements projected by Scale BB to 2018.

For Females: RP 2000 Disabled Mortality Table for Females, set forward five years, with mortality improvements projected by Scale BB to 2018.

The actuarial assumptions used in the July 1, 2016 valuation were based on the results of the last actuarial experience study, dated May 1, 2014.

Paragraph 78:

- (a) **Discount rate.** The discount rate used to measure the total pension liability was 7.75 percent.
- (b) **Projected cash flows:** The projection of cash flows used to determine the discount rate assumed that plan member contributions and Employer contributions will be made at the current contribution rates as set out in state statute. These rates are shown on the following page. In addition to these contributions the State will contribute \$25 million annually to the System payable July 1st of each year:

MCA 19-20-605 requires each employer to contribute 9.85% of total compensation paid to all re-employed TRS retirees employed in a TRS reportable position. Pursuant to MCA 19- 20-609, this amount shall increase by 1.00% for fiscal year 2014 and increase by 0.10% each fiscal year through 2024 until the total employer contribution is equal to 11.85% of re-employed retiree compensation.

**History of Legislated Contributions
(As a Percent of Pay)**

School District and Other Employers

July 1, 2016 to June 30, 2017	8.15%	11.15%	0.11%	19.41%
July 1, 2017 to June 30, 2018	8.15%	11.25%	0.11%	19.51%
July 1, 2018 to June 30, 2019	8.15%	11.35%	0.11%	19.61%
July 1, 2019 to June 30, 2020	8.15%	11.45%	0.11%	19.71%
July 1, 2020 to June 30, 2021	8.15%	11.55%	0.11%	19.81%
July 1, 2021 to June 30, 2022	8.15%	11.65%	0.11%	19.91%
July 1, 2022 to June 30, 2023	8.15%	11.75%	0.11%	20.01%
July 1, 2023 to June 30, 2024	8.15%	11.85%	0.11%	20.11%

- (c) **Long term rate of return:** The long-term expected return on plan assets is reviewed as part of the regular experience studies prepared for the System. The most recent analysis, performed for the period covering fiscal years 2009 through 2013, is outlined in a report dated May 1, 2014. Several factors are considered in evaluating the long-term rate of return assumption including long term historical data, estimates inherent in current market data, and a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected return, net of investment expense and inflation) were developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The capital market assumptions developed by the investment consultant are intended for use over a 10-year horizon and may not be useful in setting the long-term rate of return for funding pension plans which covers a longer timeframe. The assumption is intended to be a long term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years.
- (d) **Municipal bond rate:** the discount rate determination does not use a municipal bond rate.
- (e) **Periods of projected benefit payments:** Projected future benefit payments for all current plan members were projected through 2122.
- (f) **Assumed asset allocation:** The target asset allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Classes	Target Asset Allocation	Long-Term Expected Real Rate of Return*	Long-Term Expected Real Rate of Return*
	(a)	(b)	(a) x (b)
Broad US Equity	36.00%	4.80%	1.73%
Broad Int. Equity	18.00%	6.05%	1.09%
Private Equity	12.00%	8.50%	1.02%
Intermediate Bonds	23.40%	1.50%	0.35%
Core Real Estate	4.00%	4.50%	0.18%
High Yield Bonds	2.60%	3.25%	0.08%
Non-Core Real Estate	<u>4.00%</u>	7.50%	<u>0.30%</u>
	100.00%		4.75%
		Inflation	<u>3.25%</u>
		Expected arithmetic nominal return	8.00%

* The long-term expected nominal rate of return above of 8.00% differs from the total TRS long-term rate of return assumption of 7.75%. The assumed rate is comprised of a 3.25% inflation rate and a real long-term expected rate of return of 4.50%.

(g): Sensitivity analysis: disclosure of the sensitivity of the net pension liability to changes in the discount rate. The following presents the net pension liability of the System, calculated using the discount rate of 7.75 percent, as well as what the System's net pension liability calculated using a discount rate that is 1-percentage-point lower (6.75 percent) or 1-percentage-point higher (8.75 percent) than the current rate:

	1% Decrease 6.75%	Current Discount Rate 7.75%	1% Increase 8.75%
System's net pension liability	\$2,451,115,994	\$1,826,842,979	\$1,301,274,169

Paragraph 80(a): This paragraph requires the disclosure of the employer's proportionate share of the Collective NPL and if an employer has as special funding situation, the portion of the non-employer contributing entities proportionate share of the collective NPL that is associated with the employer. These amounts are shown in Schedule E.

Paragraph 80(b): This paragraph requires disclosure of the employer's proportion (percentage) of the collective NPL and the change in the proportion since the prior measurement date. The proportions are shown on Schedule D for all employers.

Paragraph 80(c): July 1, 2016 is the actuarial valuation date upon which the TPL is based. No rollforward procedures were used to determine the TPL.

Paragraphs 80(d)-(e):

Changes in actuarial assumptions and other inputs: Since the previous measurement date the normal cost method has been updated to align the calculation of the projected compensation and the total present value of plan benefits so that the normal cost rate reflects the most appropriate allocation of plan costs over future compensation.

Changes in benefit terms: There were no changes to the plan provisions since the previous measurement date.

Paragraph 80(f): There were no changes between the measurement date of the collective net pension liability and the reporting date. However, each employer may have unique circumstances that will impact the employer's proportionate share of the collective net pension liability. If there were changes that are expected to have an impact on the net pension liability, the employer should disclose the amount of the expected resultant change in the employer's proportionate share of the collective net pension liability, if known.

Paragraph 80(g): Please see Section V of the report for the development of the collective Pension Expense. Pension Expense for each employer is shown on Schedule E.

Paragraph 80(h): Since certain expense items are amortized over closed periods each year, the deferred portions of these items must be tracked annually. If the amounts serve to reduce pension expense they are labeled deferred inflows. If they will increase pension expense they are labeled deferred outflows. As noted in the previous section, the amortization of these amounts is accomplished on a level dollar basis, with no interest included in the deferred amounts. Experience gains/losses and the impact of changes in actuarial assumptions, if any, are amortized over the average remaining service life of the active and inactive System members at the beginning of the fiscal year. Investment gains and losses are amortized over a fixed five year period.

The table below provides a summary of the collective deferred inflows and outflows as of the Measurement Date.

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ 9,767,750	\$ 3,883,401
Changes of assumptions	11,625,606	11,482,259
Net difference between projected and actual earnings on plan investments	117,640,205	-
Total	<u>\$ 139,033,561</u>	<u>\$ 15,365,660</u>

Paragraph 80(i): The collective amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Deferred Amounts to be recognized in Fiscal Years Ending			
	Deferred Outflows of Resources		Deferred Inflows of Resources
2018	\$	24,458,195	\$ 5,795,891
2019		7,485,165	5,663,820
2020		64,861,561	3,905,949
2021		42,228,640	0
2022		0	0
Thereafter		0	0

Paragraph 80(j): The amount of revenue recognized for the support provided by non-employer contributing entities for the participating employers is shown in Schedule E.

SECTION IV – REQUIRED SUPPLEMENTARY INFORMATION

There are several tables of Required Supplementary Information (RSI) that need to be included in the System's financial statements:

Paragraphs 81(a) and (b): This information will be provided by the System.

Paragraph 82: Information about factors that significantly affect trends in the amounts reported in the schedules required by paragraph 81 should be presented as notes to the schedule.

Changes of benefit terms: The following changes to the plan provisions were made as identified:

2013:

HB 377 was passed which provides additional revenue and creates a two tier benefit structure. A Tier One Member is a person who first became a member before July 1, 2013 and has not withdrawn their member's account balance. A Tier Two Member is a person who first becomes a member on or after July 1, 2013 or after withdrawing their member's account balance, becomes a member again on or after July 1, 2013.

HB 377 temporarily reduced the Guaranteed Annual Benefit Adjustment (GABA) for Tier One Members hired prior to July 1, 2013 until certain funding parameters are met. This law was challenged in the Courts. In the initial Court Case, the Judge issued a Summary Judgment in favor of the plaintiffs. The Attorney General's Office, on behalf of the State and TRS, entered into a settlement agreement not to appeal the decision to a higher court. Therefore, members Tier One Members hired prior to July 1, 2013 will continue to receive 1.5% GABA regardless of the funding condition of the System.

The second tier benefit structure for members hired on or after July 1, 2013 is summarized below.

- (1) **Final Average Compensation:** average of earned compensation paid in five consecutive years of full-time service that yields the highest average
- (2) **Service Retirement:** Eligible to receive a service retirement benefit if the member has been credited with at least five full years of creditable service and has attained the age of 60; or has been credited with 30 or more years of full-time or part-time creditable service and has attained age 55
- (3) **Early Retirement:** Eligible to receive an early retirement allowance if a member is not eligible for service retirement but has at least five years of creditable service and attained age 55
- (4) **Professional Retirement Option:** if the member has been credited with 30 or more years of service and has attained the age of 60 they are eligible for an enhanced allowance equal to 1.85% of average final compensation times all service at retirement. Otherwise, the multiplier used to calculate the retirement allowance will be equal to 1.67%
- (5) **Annual Contribution:** 8.15% of member's earned compensation
- (6) **Supplemental Contribution Rate:** On or after July 1, 2023, the TRS Board may require a supplemental contribution up to 0.5% if the following three conditions are met:
 - a. The average funded ratio of the System based on the last three annual actuarial valuations is equal to or less than 80%; and
 - b. The period necessary to amortize all liabilities of the System based on the latest annual actuarial valuation is greater than 20 years; and
 - c. A State or employer contribution rate increase or a flat dollar contribution to the Retirement System Trust fund has been enacted that is equivalent to or greater than the supplemental contribution rate imposed by the TRS Board.
- (7) **Disability Retirement:** A member will not be eligible for a disability retirement if the member is or will be eligible for a service retirement on the date of termination
- (8) **Guaranteed Annual Benefit Adjustment (GABA):**
 - a. If the most recent actuarial valuation shows that Retirement System liabilities are at least 90% funded and the provision of the increase is not projected to cause the System's liabilities to be less than 85% funded, the GABA may increase from the 0.5% floor up to 1.5%, as set by the Board.

HB 377 increased revenue from the members, employers and the State as follows:

- Annual State contribution equal to \$25 million paid to the System in monthly installments.
- One-time contribution payable to the Retirement System by the trustees of a school district maintaining a retirement fund. The one-time contribution to the Retirement System shall be the amount earmarked as an operating reserve in excess of 20% of the adopted retirement fund budget for the fiscal year 2013. This amount has been estimated to be \$14.7 million payable October 1, 2013.
- 1% supplemental employer contribution. This will increase the current employer rates:
 - School Districts contributions will increase from 7.47% to 8.47%
 - The Montana University System and State Agencies will increase from 9.85% to 10.85%.
 - The supplemental employer contribution will increase by 0.1% each fiscal year for fiscal year 2014 thru fiscal year 2024. Fiscal years beginning after June 30, 2024 the total supplemental employer contribution will be equal to 2%.
- Members hired prior to July 1, 2013 (Tier 1) under HB 377 are required to contribute a supplemental contribution equal to an additional 1% of the member's earned compensation.
- Each employer is required to contribute 9.85% of total compensation paid to all re-employed TRS retirees employed in a TRS reportable position to the System.

Changes of assumption and other inputs: The following changes to the actuarial assumptions were made as identified:

2016:

- The normal cost method has been updated to align the calculation of the projected compensation and the total present value of plan benefits so that the normal cost rate reflects the most appropriate allocation of plan costs over future compensation.

2015:

- Correctly reflect the proportion of members that are assumed to take a refund of contributions upon termination and appropriately reflect the three year COLA deferral period for Tier 2 Members.
- The 0.63% load applied to the projected retirement benefits of the university members “to account for larger than average annual compensation increases observed in the years immediately preceding retirement” should not be applied to benefits expected to be paid to university members on account of death, disability and termination (prior to retirement eligibility).
- The actuarial valuation should be updated so that the assumed rate of retirement for university members at age 60 is 8.50% as stated in the actuarial valuation report.
- The actuarial valuation should be updated to reflect the fact that vested terminations are only covered by the \$500 death benefit for the one year following their termination and, once again when the terminated member commences their deferred retirement annuity (they are not covered during the deferral period). Additionally, only the portion of the terminated members that are assumed to “retain membership in the System” should be covered by the \$500 death benefit after termination.

2014:

- Assumed rate of inflation was reduced from 3.50% to 3.25%
- Payroll Growth Assumption was reduced from 4.50% to 4.00%
- Assumed real wage growth was reduced from 1.00% to 0.75%
- Investment return assumption was changed from net of investment and administrative expensed to net of investment expenses only.
- Mortality among contributing members, service retired members, and beneficiaries was updated to the following:
 - For Males: 1992 Base Rates from the RP 2000 Healthy Annuitant Mortality Table for ages 50 and above and 1992 Base Rates from the RP 2000 Combined Healthy Annuitant Mortality Table for ages below 50, set back four years, with mortality improvements projected by Scale BB to 2018.
 - For Females: 1992 Base Rates from the RP 2000 Healthy Annuitant Mortality Table for ages 50 and above and 1992 Base Rates from the RP 2000 Combined Healthy Annuitant Mortality Table for ages below 50, set back two years, with mortality improvements projected by Scale BB to 2018.
- Mortality among disabled members was updated to the following:
 - For Males: RP 2000 Disabled Mortality Table for Males, set forward one year, with mortality improvements projected by Scale BB to 2018.
 - For Females: RP 2000 Disabled Mortality Table for Females, set forward five years, with mortality improvements projected by Scale BB to 2018.

Method and assumptions used in calculations of actuarially determined contributions. The actuarially determined contribution rates are determined on an annual basis for the fiscal year beginning July 1, 2016, determined as of June 30, 2016.

The following actuarial methods and assumptions were used to determine actuarial contribution rates reported in that schedule:

Actuarial cost method	Entry age
Amortization method	Level percentage of pay, open
Remaining amortization period	24 years
Asset valuation method	4-year smoothed market
Inflation	3.25 percent
Salary increase	4.00 to 8.51 percent, including inflation for Non-University Members and 5.00% for University Members;
Investment rate of return	7.75 percent, net of pension plan investment expense, and including inflation

SECTION V – PENSION EXPENSE

As noted earlier, the Pension Expense (PE) consists of a number of different items. GASB 68 refers to the first as Service Cost which is the Normal Cost using the Entry Age Normal actuarial funding method. To this is added interest on the TPL at the rate of return in effect as of the prior measurement date.

The next three items refer to any changes that occurred in the TPL (i.e., actuarial accrued liability (AAL) under EAN) due to:

1. Benefit changes,
2. Actual versus expected experience or
3. Changes in actuarial assumptions.

Benefit changes, which are reflected immediately in PE, can be positive, if there is a benefit improvement for existing Plan members, or negative if there is a benefit reduction. For the year ended June 30, 2016 there were no benefit changes to be recognized.

The next item to be recognized is the portion of current year changes in TPL due to actual versus expected experience for the year. The portion to recognize in the current year is determined by spreading the total change over the average expected remaining service life of the entire Plan membership. The remaining service life of active members is the average number of years the active members are expected to remain active. For the year ended June 30, 2016 this number is 10.01. The remaining service life of the inactive members is, of course, zero. The figure to use for the amortization is the weighted average of these two amounts, or 3.85. The development of the average remaining service life is shown in the table below.

Calculation of Weighted Average Years of Working Lifetime

Category	Number (1)	Average Years of Working Lifetime (2)
a. Active Members	18,316	10.01
b. Inactive Members	<u>29,342</u>	0.00
c. Total	47,658	
Weighted Average Years of Working Lifetime [(a1 * a2) + (b1 * b2)]/c1		3.85

The last items under changes in TPL are changes in actuarial assumptions. The portion to recognize in the current year is determined by spreading the total change over the average expected remaining service life of the entire Plan membership, similar to the way experience gains and losses are recognized.

Member contributions for the year and projected earnings on the FNP at the discount rate serve to reduce the expense. One-fifth of current-period difference between actual and projected earning on the FNP is recognized in the pension expense. The development of the expected return on assets is shown in the table below.

The current year portions of previously determined experience, assumption, and earnings amounts, recognized as deferred inflows and outflows are included. Deferred outflows are added to the PE and deferred inflows are subtracted from the PE. Finally administrative expenses and other miscellaneous items are included.

Calculation of Expected Return on Assets For the Fiscal Year Ending June 30, 2016	
(1) Market Value of Assets - Beginning of Year	\$ 3,708,385,838
(2) Expected Return on Market Value [(1) x 0.0775]	287,399,902
(3) a. Employee Contributions	72,740,665
b. Employer Contributions	132,546,252
c. Benefit Payments & Refund of Contributions	(325,897,075)
d. Administrative Expenses	(2,318,818)
e. Other Changes	(142,849)
f. Net Cash Flow [(3)a. + (3)b. + (3)c. + (3)d. + (3)e.]	(123,071,825)
(4) Expected Return on Cash Flow Items [(3)f. x 0.0775 x 0.5]	(4,769,033)
(5) Expected Return on Assets [(2) + (4)]	\$282,630,869

The calculation of the collective Pension Expense for the year ended June 30, 2016 is shown in the following table.

Collective Pension Expense Determined as of the Measurement Date	
Service Cost	\$ 73,530,938
Interest on the total pension liability	402,339,969
Current-period benefit changes	-
Expensed portion of current-period difference between expected and actual experience in the total pension liability	(1,362,597)
Expensed portion of current-period changes of assumptions	(3,232,638)
Member contributions	(72,740,665)
Projected earnings on plan investments	(282,630,869)
Expensed portion of current-period differences between actual and projected earnings on plan investments	42,228,642
Administrative expense	2,318,818
Other*	(246,442)
Recognition of beginning deferred outflows of resources as pension expense	19,183,192
Recognition of beginning deferred inflows of resources as pension expense	(38,154,297)
Pension expense	\$ 141,234,051

* Includes Miscellaneous Income of (\$29,123), other Pension & OPEB expenses of \$142,849, and other contributions of (\$360,168) not applied to employer allocations.

SCHEDULE A

SUMMARY OF PLAN PROVISIONS

Effective Date

September 1, 1937.

Vesting Period

Five years. No benefits are payable unless the member has a vested right, except the return of employee contributions with interest.

Tier One Member

A person who became a member before July 1, 2013 and who has not withdrawn the member's account balance.

Tier Two Member

A person who became a member on or after July 1, 2013, or who after withdrawing the member's account balance, became a member again after July 1, 2013.

Final Compensation

Tier One Members

Average of highest three consecutive years of earned compensation.

Tier Two Members

Average of highest five consecutive years of earned compensation.

Normal Form of Benefits

Life only annuity. All benefits cease upon death; however, in no event will the member receive less than the amount of employee contributions with interest.

Normal Retirement Benefits

Tier One Members

- Eligibility: 25 years of service or age 60 with five years of service.
- Benefit: The retirement benefit is equal to $1/60$ of final compensation for each year of service.

Tier Two Members

- Eligibility: Age 55 with 30 years of service or age 60 with five years of service.
- Benefit: A member age 60 with at least 30 years of creditable service will receive a retirement allowance equal to 1.85% of final compensation for each year of service. Otherwise, the multiplier used to calculate the retirement allowance will equal $1/60$ of final compensation for each year of service.

Early Retirement Benefits

Tier One Member

- Eligibility: Five years of service and age 50.
- Benefit: The retirement benefit is calculated in the same manner as described for normal retirement, but the benefit is actuarially reduced by the lesser of the number of years equal to the age of the participant at early retirement subtracted from age 60 or the number of years of service at early retirement subtracted from 25 years of service.

Tier Two Member

- Eligibility: Five years of service and age 55.
- Benefit: The retirement benefit is calculated in the same manner as described for normal retirement, but the benefit is actuarially reduced by the lesser of the number of years equal to the age of the participant at the early retirement subtracted from age 60 or the number of years of service at early retirement subtracted from 30 years of service.

Death Benefit

Eligibility: Five years of service.

Benefit: The death benefit is equal to $\frac{1}{60}$ of final compensation for each year of service accrued at date of death, with an actuarial adjustment based on the relation of the member's age at death to the beneficiary's age. A monthly benefit of \$200 is paid to each child until age 18. In addition, a lump-sum benefit of \$500 is paid upon the death of an active or retired member.

Disability Benefit

Eligibility: Five years of service.

Benefit: The disability benefit is equal to $\frac{1}{60}$ of final compensation for each year of service accrued at date of disability. The minimum benefit is $\frac{1}{4}$ of the final compensation. A Tier Two Member is not eligible for a disability retirement if the member is or will be eligible for a service retirement on or before the member's date of determination.

Withdrawal Benefits

With less than five years of service, the accumulated employee contributions with interest are returned. With more than five years, the member may elect a refund of contributions with interest or leave the contributions and interest in the System and retain a vested right to retirement benefits.

Contributions

Tier One Member: 7.15% of compensation. Tier One members are required to contribute a Supplemental Contribution equal to an additional 1% of compensation. The Board may decrease the Supplemental Contribution if the average funded ratio of the System based on the last three actuarial valuations is equal to or greater than 90% and the period necessary to amortize the unfunded liabilities of the System based on the most recent actuarial valuation is less than 15 years. Following one or more decreases in the supplemental contribution the Board may increase the supplemental contribution to a rate not to exceed 1% if the average funded ratio of the System based on the last three annual actuarial valuations is equal to or less than 80% and the period necessary to amortize all liabilities of the System based on the most recent annual actuarial valuation is greater than 20 years.

Tier Two Member: 8.15% of compensation. The Board may require a Tier Two member to contribute a Supplemental Contribution if the average funded ratio of the System based on the last three actuarial valuations is equal to or less than 80% and the period necessary to amortize the unfunded actuarial accrued liability is greater than 20 years and a State or employer contribution rate increase or a flat dollar contribution to the System has been enacted which is equivalent to or greater than the Supplemental Contribution Rate imposed by the Board. A single Tier Two Supplemental Contribution Rate increase cannot exceed 0.5% of compensation and in total cannot exceed 9.15% of compensation. The Board may decrease the Supplemental Contribution if the average funded ratio of the System based on the previous three annual actuarial valuations is equal to or greater than 90%; and the period necessary to amortize the unfunded actuarial accrued liability is less than 15 years.

Employer and General Fund Contributions:

- School District and Other Employers equal the sum of the following:
 - General Fund – 2.49% of compensation
 - Employer - 7.47% of compensation
 - Employer Supplemental Contribution - 1% of compensation effective Fiscal Year 2014 and increasing by 0.1% for each fiscal year through June 30, 2024.
- State and University Employers equal the sum of the following:
 - General Fund – 0.11% of compensation
 - Employers - 9.85% of compensation
 - Employer Supplemental Contribution - 1% of compensation effective Fiscal Year 2014 and increasing by 0.1% for each fiscal year through June 30, 2024.

The Board may decrease the Employer Supplemental Contribution if the average funded ratio of the System based on the last three actuarial valuations is equal to or greater than 90% and the period necessary to amortize the unfunded actuarial accrued liability based on the most recent valuation is less than 15 years and the GABA has been increased to the maximum allowable. Following one or more decreases in the Supplemental Contribution Rate the Board may increase the Supplemental Contribution Rate to a rate not to exceed 1% if the average funded ratio of the System based on the last three actuarial valuations is equal to or less than 80% and the period necessary to amortize the unfunded actuarial accrued liability is greater than 20 years.

MCA 19-20-604 specifies that the employer contribution rate will be reduced by 0.11% when the amortization period of the System's UAAL is 10 years or less according to the System's latest actuarial valuation.

State Supplemental Contribution: \$25 million per year on an annual basis payable on July 1st of each year.

Re-employed Retirees: Each employer is required to contribute 9.85% of total compensation paid to all re-employed TRS retirees employed in a TRS reportable position. This amount shall increase by 1.00% for fiscal year 2014 and increase by 0.10% each fiscal year through 2024 until the total employer contribution is equal to 11.85% of re-employed retiree compensation.

Interest on Member contributions

Effective July 1, 2014, the interest credited on member contributions is reduced from 0.25% to 0.20% per annum.

Guaranteed Annual Benefit Adjustment (GABA)

On January 1 of each year, if the retiree has received benefits for at least 36 months prior to January 1 of the year in which the adjustment is to be made, for Tier One Members, the retirement allowance will be increased by 1.5%.

For Tier Two Members, the retirement allowance will be increased by an amount equal to or greater than 0.5% but no more than 1.5% if the most recent actuarial valuation shows the System to be at least 90% funded and the provisions of the increase is not projected to cause the funded ratio to be less than 85%.

Schedule B

STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

Retirement, disablement and termination of employment assumptions reflect the five-year experience study for the period ending 2009 adopted by the Board on May 13, 2010.

The assumed rates of mortality are based a five-year experience study for the period ending 2013 adopted by the Board on May 13, 2014.

The current asset valuation method was adopted for the July 1, 2007 valuation.

Tables A-3 through A-6 give rates of decrement for service retirement, disablement, mortality, and other terminations of employment.

Actuarial Cost Method

The actuarial valuation was prepared using the entry age actuarial cost method. Under this method, the actuarial present value of the projected benefits of each individual included in the valuation is allocated as a level percentage of the individual's projected compensation between entry age and assumed exit. The portion of this actuarial present value allocated to a valuation year is called the normal cost. The normal cost was first calculated for each individual member. The normal cost rate is defined to equal the total of the individual normal costs, divided by the total pay rate.

The portion of this actuarial present value not provided for at a valuation date by the sum of (a) the actuarial value of the assets and (b) the actuarial present value of future normal costs is called the UAAL. The UAAL is amortized as a level percentage of the projected salaries of present and future members of the System.

Records and Data

The data used in the valuation consist of financial information; records of age, sex, service, salary, contribution rates, and account balances of contributing members; and records of age, sex, and amount of benefit for retired members and beneficiaries. All of the data were supplied by the System and are accepted for valuation purposes without audit.

Replacement of Terminated Members

The ages at entry and distribution by sex of future members are assumed to average the same as those of the present members they replace. If the number of active members should increase, it is further assumed that the average entry age of the larger group will be the same, from an actuarial standpoint, as that of the present group. Under these assumptions, the normal cost rates for active members will not vary with the termination of present members.

Employer Contributions

At the time of this valuation, the total employer contribution rate for normal costs and amortization of the UAAL was 11.16% of members' salaries. The employer contribution rate will increase by 0.10% each year beginning July 1, 2014 until the total employer contribution rate equals 11.96%.

Administrative and Investment Expenses

The investment expenses of the System are assumed to be funded by investment earnings in excess of 7.75% per year.

Administrative expenses are assumed to equal 0.31% of payroll.

Valuation of Assets - Actuarial Basis

The actuarial asset valuation method spreads asset gains and losses over four years. The expected return is determined each year based on the beginning of year market value and actual cash flows during the year. Any difference between the expected market value return and the actual market value return is recognized evenly over a period of four years. The actuarial value of assets is not allowed to be greater than 120% or less than 80% of the market assets. (Adopted effective July 1, 2007.)

Investment Earnings

The annual rate of investment earnings of the assets of the System is assumed to be 7.75% per year net of investment expenses, compounded annually. (Adopted effective July 1, 2014)

Interest on Member Contributions

Interest on member contributions is assumed to accrue at a rate of 5% per annum, compounded annually. This assumption was set as of July 1, 2004.

Postretirement Benefit Increases

Tier 1 Members:

On January 1 of each year, the retirement allowance payable is increased by 1.5% if the retiree has received benefits for at least 36 months prior to January 1 of the year in which the adjustment is to be made.

Tier 2 Members:

On January 1 of each year, the retirement allowance payable is assumed to increase by 0.5% if the retiree has received benefits for at least 36 months prior to January 1 of the year in which the adjustment is to be made.

Future Salaries

The rates of annual salary increase assumed for the purpose of the valuation are illustrated in Table C-2. In addition to increases in salary due to merit and longevity, this scale includes an assumed 4.0% annual rate of increase in the general wage level of the membership. The merit and longevity increases for the MUS members did not show a pattern of increasing or decreasing with service at the time of our most recent study. Therefore, the MUS members have a flat 1% merit and longevity assumption. The general wage increase assumption was adopted July 1, 2004 and the merit and longevity scales were adopted July 1, 2002.

Montana University System (MUS) members are assumed to have a 0.63% higher average final compensation to account for the larger than average annual compensation increases observed in the years immediately preceding retirement.

Service Retirement

Table C-3 shows the annual assumed rates of retirement among members eligible for service retirement. Separate rates are used when a member is eligible for reduced benefits, for the first year a member is eligible for full benefits, and for the years following the first year a member is eligible for full benefits. The rates for General Members were adopted May 13, 2010. The rates for University Members were adopted May 13, 2010.

Disablement

The rates of disablement used in this valuation are illustrated in Table C-4. These rates were adopted May 13, 2010.

Mortality

The mortality rates used in this valuation are illustrated in Table C-5. A written description of each table used is included in Table C-1. These rates were adopted July 1, 2014.

Other Terminations of Employment

The rates of assumed future withdrawal from active service for reasons other than death, disability or retirement are shown for representative ages in Table C-6. These rates were adopted May 13, 2010.

Benefits for Terminating Members

Members terminating with less than five years of service are assumed to request an immediate withdrawal of their contributions with interest. Table C-7 shows the assumed probability of retaining membership in the System among members terminating with five or more years of service. These rates were adopted July 1, 2002.

We estimated the present value of future benefits for terminated vested members based on the greater of the present value of their deferred benefit at age 60 or their available contribution account.

Part-Time Employees

The valuation data for active members identify part-time members. For part-time members earning more than \$1,000, total credited service is adjusted based on the ratio of actual earnings to annualized earnings. The liability and normal cost calculations for these members are based on the adjusted service and actual earnings for the prior year.

Part-time members earning less than \$1,000 during the last year were valued at their current member contribution balance.

Montana University System Retirement Program (MUS-RP)

MUS-RP payroll as of June 30, 2016 \$236,465,298.

Effective for fiscal years after June 30, 2007, the MUS-RP contribution rate is 4.72%, pursuant to MCA 19-20-621. In prior valuations, the Supplemental Contribution of 4.72% of MUS-RP payroll was assumed to cease in 2033. It is our understanding the contribution will not stop unless legislative action is taken.

Buybacks, Purchase of Service, and Military Service

The active liabilities and normal cost (excluding liabilities and normal cost in respect of Return of Employee Contributions) were increased to 100.5% of their original value to fund this additional service based on a study of the System's experience for the five calendar years 1995 through 1999. Effective July 1, 2008.

Probability of Marriage & Dependent Children

If death occurs in active status, all members are assumed to have an eligible surviving spouse and two children. The spouse is assumed to be the same age as the member. For members who die prior to age 50, dependent children are assumed to be eight years old. For members who die after age 50 but prior to age 55, children are assumed to be 13 years old. Members who die after age 55 are assumed to have no dependent children under the age of 18.

Records with no Birth Date

New records with no birth date are assumed to be 25 years old. Records that are not new and have no birth date used the same birth date as the prior year's valuation.

**Table B-1****Summary of Valuation Assumptions**

I. Economic assumptions		
A.	General wage increases* (Adopted July 1, 2014)	4.00%
B.	Investment return (Adopted July 1, 2004)	7.75%
C.	Price Inflation Assumption (Adopted July 1, 2014)	3.25%
D.	Growth in membership	0.00%
E.	Postretirement benefit increases (Starting three years after retirement)	
	Tier One	1.50%
	Tier Two	0.50%
F.	Interest on member accounts (Adopted July 1, 2004)	5.00%
II. Demographic assumptions		
A.	Individual salary increase due to promotion and longevity (General Member assumptions adopted July 1, 2002) (University Member assumptions adopted July 1, 2000)	Table B-2
B.	Retirement (adopted May 13, 2010)	Table B-3
C.	Disablement (adopted May 13, 2010)	Table B-4
D.	Mortality among contributing members, service retired members, and beneficiaries. The tables include margins for mortality improvement which is expected to occur in the future. For Males: 1992 Base Rates from the RP 2000 Healthy Annuitant Mortality Table for ages 50 and above and 1992 Base Rates from the RP 2000 Combined Healthy Annuitant Mortality Table for ages below 50, set back four years, with mortality improvements projected by Scale BB to 2018 (adopted July 1, 2014). For Females: 1992 Base Rates from the RP 2000 Healthy Annuitant Mortality Table for ages 50 and above and 1992 Base Rates from the RP 2000 Combined Healthy Annuitant Mortality Table for ages below 50, set back two years, with mortality improvements projected by Scale BB to 2018 (adopted July 1, 2014).	Table B-5
E.	Mortality among disabled members For Males: RP 2000 Disabled Mortality Table for Males, set forward one year, with mortality improvements projected by Scale BB to 2018 (adopted July 1, 2014). For Females: RP 2000 Disabled Mortality Table for Females, set forward five years, with mortality improvements projected by Scale BB to 2018 (adopted July 1, 2014).	Table B-5
F.	Other terminations of employment (adopted May 13, 2010)	Table B-6
G.	Probability of retaining membership in the System upon vested termination (adopted July 1, 2002)	Table B-7

* Montana University System (MUS) members are assumed to have a 0.63% higher average final compensation to account for the larger than average annual compensation increases observed in the years immediately preceding retirement.

Table B-2
Future Salaries

Schedule of Pension Amounts by Employer and Non-Employer Contributing Entity

(Schedule E)

For the measurement period July 1, 2015 – June 30, 2016 and for the reporting date June 30, 2017

The accompanying notes to the Schedule of Pension Amounts by Employer and Non Employer Contributing Entity are an integral part of understanding the schedules

Employer Code	Employer	Beginning of Year Net Pension Liability	End of Year Net Pension Liability	Deferred Outflows of Resources					Deferred Inflows of Resources					Pension Expense		
				Difference Between Expected & Actual Experience	Net Difference Between Projected & Actual Earnings on Pension Plan Investments	Changes of Assumptions	Changes in Proportion & Differences Between Employer Contributions & Proportionate Share of Contributions	Total Deferred Outflows of Resources	Difference Between Expected & Actual Experience	Net Difference Between Projected & Actual Earnings on Pension Plan Investments	Changes of Assumptions	Changes in Proportion & Differences Between Employer Contributions & Proportionate Share of Contributions	Total Deferred Inflows of Resources	Proportionate Share of Pension Expense	Deferred Amounts from Changes in Proportion & Differences Between Employer Contributions & Proportionate Share of Contributions	Total Employer Pension Expense

Teachers' Retirement System State of Montana

Note to Schedule of Employer and Non-Employer Contributing Entity Allocations (Schedule D) and Schedule of Pension Amounts by Employer and Non-Employer Contributing Entity (Schedule E)

In accordance GASB Statement 68 (the standard), for the purpose of financial reporting, the amounts and percentages in Schedule D and E will be utilized by each employer of the System to present their proportionate share of liability and pension amounts associated with the employer's participation in Teachers' Retirement System (TRS). The schedules were prepared by Cavanaugh Macdonald Consulting, LLC; however the report and schedules herein are the responsibility of TRS management.

The Schedule of Employer and Non Employer Contributing Entity Allocations (Schedule D) displays the proportionate relationship of each employer to all employers and each employer's allocation percentage. Secondly, Schedule D displays the proportionate relationship of the nonemployer contributing entity (The State of Montana) to all employers and the non-employer contributing entity's allocation percentage. Third, Schedule D displays the amounts and percentages of the overall non-employer contributing entity's contribution that is associated with each employer. Lastly, Schedule D displays all the allocation percentages described above for the measurement year (2016) as well as the previous year (2015) and the difference in the allocation from year to year (The Change in Proportion).

The allocation percentages in Schedule D are derived based on actual normal employer contributions made to TRS during the measurement periods (FY 2015 and FY 2016 normal employer contributions). Contributions other than normal employer contributions (termination pay contributions, working retiree contributions, buy back contributions, and in some cases MUSRP supplemental contributions) are not included in the allocation calculation but instead are included in total contributions and reported as deferred outflows/inflows of resources. There is a small amount of employer contributions that cannot be attributed to any specific employer due to timing differences. These employer contributions are utilized to reduce the Pension Expense of the system and therefore allocated to each employer equally. Employee contributions are also utilized to reduce the collective pension expense of the system.

The Schedule of Pension Amounts by Employer and Non Employer Contributing Entity (Schedule E) displays the various pension amounts, as of the measurement date (June 30, 2016), allocated to the employer and non-employer contributing entities. Some amounts are allocated to the employers and non-employer contributing entities based on the allocation percentages calculated in Schedule D. These amounts include each employer's proportionate share of the Net Pension Liability, the deferred inflows and outflows of the system, the proportionate share of the nonemployer contributing entity's Net Pension Liability, and the non-employer contributing entity deferred inflows and outflows of the system. Some amounts in Schedule E are calculated according to the standard. These amounts include the Change in Proportion & Difference between Employer Contributions and Proportionate Share of Contributions of the employer and non-employer contributing entity, and the Pension Expense of the employer and non-employer contributing entity.

As stated above, the deferred inflows and outflows of the system are allocated to each employer based on the allocation percentages calculated in Schedule D. These inflows and outflows of the system are calculated per the standard and include the Difference Between Expected and Actual Experience, the Net Difference Between Projected and Actual Investment Earnings on Pension Plan Investments, and The Changes of Assumptions. These deferred inflows/outflows of the system are recognized over time in the Pension Expense of the system per the standard. The amounts not recognized in the current measurement period (FY 2016) are recorded as deferred inflows/outflows of the system and allocated to employers. Therefore, each of these deferred inflows/outflows of the system incorporates several years' worth of information to comprise the totals. The deferred inflow/outflow for Changes of Assumptions includes amounts that have been deferred for previous measurement periods as well as the current measurement period (FY 2016). The changes of assumptions that were incorporated in FY 2016 (the current measurement period) were as follows. Since the previous measurement date the normal cost method has been updated to align the calculation of the projected compensation and the total present value of plan benefits so that the normal cost rate reflects the most appropriate allocation of plan costs over future compensation.

At the employer level, the difference between total employer contributions (including normal contributions, working retiree contributions, termination pay contributions, buy back contributions, and in some cases MUS-RP supplemental contributions) and the amount of the employers proportionate share of the total contributions for the system are recognized in pension expense according to the standard. The amount not recognized in the pension expense is reported as a deferred inflow or a deferred outflow of resources for each employer according to the standard. The change in the employer's allocation percentage from year to year is also recognized in pension expense according to the standard. The amount not recognized in the pension expense is reported as a deferred inflow or a deferred outflow of resources for each employer according to the standard. These two categories are combined in Schedule E and reported in the columns labeled Change in Proportion & Difference between Employer Contributions & Proportionate Share of Contributions.

At the system level, Schedule E displays total Change in Proportion & Differences between Employer Contributions & Proportionate Share of Contributions as a deferred outflow of resources in the amount of \$47,367,680 and total deferred inflow of resources in the amount of \$47,367,680 due to Change in Proportion & Differences between Employer Contributions & Proportionate Share of Contributions. These amounts offset each other therefore they do not impact the collective deferred inflows of resources and deferred outflows of resources for the system as a whole. This phenomenon is reported in a separate row totaling the Collective Pension Amounts of the System at the end of the schedule. This total does not include the \$47,367,680 in deferred inflows and outflows as they are not part of the collective pension amounts of the system.

The amounts in Schedule E allocated to the State as a non-employer contributing entity are included in the Total All Employers & State amount at the end of Schedule E. The State's (Non-Employer Contributing Entity) totals are displayed on a separate line total for clarity. Lastly, as state above, the Collective Pension Amounts of the System are also displayed at the end of Schedule E.
