April 19, 2024

Teachers' Retirement Board  
State of Montana  
P.O. Box 200139  
Helena, MT 59620-0139

Members of the Board:

Presented in this report is information to assist the Teachers' Retirement System (System) in providing necessary Governmental Accounting Standards Board (GASB) Statement No. 68 disclosure information to participating employers. This report has been prepared as of June 30, 2023 (the measurement date) to assist the System in meeting the requirements of GASB Statement No. 68 and to identify the information to be provided by the actuary, Cavanaugh Macdonald Consulting, LLC. GASB Statement No. 68 establishes accounting and financial reporting requirements for governmental employers that provide pension benefits to their employees through a trust.

The annual actuarial valuation used as a basis for much of the information presented in this report was performed as of July 1, 2023. The valuation was based upon data, furnished by System staff, concerning active, inactive and retired members along with pertinent financial information.

To the best of our knowledge, this report is complete and accurate. The necessary calculations were performed by, and under the supervision of, independent actuaries who are members of the American Academy of Actuaries with experience in performing valuations for public retirement systems.

The calculations were prepared in accordance with the principles of practice prescribed by the Actuarial Standards Board and, in our opinion, meet the requirements of GASB 68.

The actuarial calculations were performed by qualified actuaries according to generally accepted actuarial procedures and methods. The calculations are based on the current provisions of the System, and on actuarial assumptions that are, individually and in the aggregate, internally consistent and reasonably based on the actual experience of the System. In addition, the calculations were completed in compliance with the laws governing the System. The undersigned are members of the American Academy of Actuaries and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

In order to prepare the results in this report, we have utilized actuarial models that were developed to measure liabilities and develop actuarial costs. These models include tools that we have produced and tested, along with commercially available valuation software that we have reviewed to confirm the appropriateness and accuracy of the output. In utilizing these models, we develop and use input parameters and assumptions about future contingent events along with recognized actuarial approaches to develop the needed results.

## **SECTION II – INTRODUCTION**

This report, prepared as of June 30, 2023 (the Measurement Date), presents information to assist the System in providing the required information under GASB 68 to the participating employers of the Teachers' Retirement System (TRS). Much of the material provided in this report is based on the results of the GASB 67 report for the System. See that report for more information on the member data, actuarial assumptions and methods used in developing the GASB 67 results.

GASB 68 creates disclosure and reporting requirements that may or may not be consistent with the basis used for funding the Plan. GASB 68 requires each of the participating employers and non-employer contributing entities to include a proportionate share of a Net Pension Liability (NPL) and to recognize a proportionate share of a Pension Expense (PE) in their financial statements.

The NPL shown in the GASB Statement No. 67 Report for the System as of June 30, 2023 is the collective NPL used for purposes of GASB 68. Please refer to that report for the derivation of the collective NPL.

Pension Expense includes amounts for service cost (the normal cost under the Entry Age Normal actuarial cost method for the year), interest on the Total Pension Liability (TPL), changes in benefit structure, amortization of increases/decreases in liability due to actuarial experience and actuarial assumption changes, and amortization of investment gains/losses. The actuarial experience and assumption change impacts are amortized over the average expected remaining service life of the plan membership as of the Measurement Date, and investment gains/losses are amortized over five years. The development of the collective PE is shown in Section V.

The System receives a portion of the total required statutory contributions directly from the State for all employers. The employers are considered to be in a special funding situation as defined by GASB 68 and the State is treated as a non-employer contributing entity in TRS. The System receives 2.49% from the State's general fund for School Districts and Other Employers. The System also receives 0.11% from the State's general fund for State and University Employers. Finally, the State is also required to contribute \$25 million in perpetuity payable July 1<sup>st</sup> of each year.

The NPL has been allocated based on actual contributions made to the System during the measurement period to determine the proportionate share to each participating employer. Schedule D of the report shows the total amount of the employer contributions for the year ending June 30, 2023 from each participating employer, and the amount of the contributions from the State.

The unrecognized portions of each year's experience, assumption changes and investment gains/losses are used to develop deferred inflows and outflows, which also must be included in the employer's financial statements. The development of the collective deferred inflows and outflows is shown in Section III.

The sections that follow provide the results of all the required aggregate calculations, presented in the order laid out in GASB 68 for note disclosure and Required Supplementary Information (RSI). The System will provide the calculation of the proportional share of the NPL, Pension Expense, and Deferred Inflows and Outflows for each participating employer or non-employer contributing entity.

Section I of this report is a summary of the principal results of the collective amounts under GASB 68. Section III and Section IV provide the results of all the necessary calculations, presented in the order laid out in GASB 68 for note disclosure and Required Supplementary Information (RSI).

### **SECTION III – FINANCIAL STATEMENT NOTES**

The material presented herein will follow the order presented in GASB 68. Paragraph numbers are provided for ease of reference. Amounts are shown in aggregate.

**Paragraph 74:** The information required is to be prepared by the System and/or the individual employer.

**Paragraph 75:** The information required is to be prepared by the individual employer.

**Paragraphs 76(a) - (b):** The information required is to be supplied by the System.

**Paragraph 77:** This paragraph requires information regarding the actuarial assumptions used to measure the TPL. The actuarial assumptions utilized in developing the TPL are outlined in Schedule B. The total pension liability was determined by an actuarial valuation as of July 1, 2023 using the following actuarial assumptions applied to all periods included in the measurement:

|                                  |                                                                                                                               |
|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>Inflation</b>                 | 2.75 percent                                                                                                                  |
| <b>Salary increases</b>          | 3.50 to 9.00 percent, including inflation for Non-University Members; 4.25 percent for University Members including inflation |
| <b>Investment rate of return</b> | 7.30 percent, net of pension plan investment expenses, including inflation                                                    |

## **Mortality**

### **Mortality among contributing members:**

PUBT-2010 General Employee mortality projected to 2021.  
Projected generationally using MP-2021.

### **Mortality among service retired members:**

PUBT-2010 Retiree mortality projected to 2021 adjusted 102% for males and 103% for females. Projected generationally using MP-2021.

### **Mortality among beneficiaries:**

PUBT-2010 Contingent Survivor table projected to 2021.  
Projected generationally using MP-2021.

### **Mortality among disabled members:**

PUBT-2010 Disabled Retiree mortality table projected to 2021.

The actuarial assumptions used in the July 1, 2023 valuation were based on the results of the last actuarial experience study, dated May 3, 2022.

## **Paragraph 78:**

- (a) **Discount rate.** The discount rate used to measure the total pension liability was 7.30 percent.
- (b) **Projected cash flows:** The projection of cash flows used to determine the discount rate assumed that plan member contributions and Employer contributions will be made at the current contribution rates as set out in state statute. These rates are shown on the following page. In addition to these contributions the State will contribute \$25 million annually to the System payable July 1<sup>st</sup> of each year.

MCA 19-20-605 requires each employer to contribute 9.85% of total compensation paid to all re-employed TRS retirees employed in a TRS reportable position. Pursuant to MCA 19- 20-609, this amount shall increase by 1.00% for fiscal year 2014 and increase by 0.10% each fiscal year through 2024 until the total employer contribution is equal to 11.85% of re-employed retiree compensation.

| July 1, 2023 to June 30, 2024 | 8.15%          | 11.85%           | 0.11%               | 20.11%                                   |

- (c) **Long term rate of return:** The long-term expected rate of return on pension plan investments of 7.30% is reviewed as part of regular experience studies prepared for the System about every five years. The current long-term rate of return is based on analysis in the experience study report dated May 3, 2022, without consideration for the administrative expense analysis shown. Several factors are considered in evaluating the long-term rate of return assumption including long-term historical data, estimates inherent in current market data, and an analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation), along with estimates of variability and correlations for each asset class. These ranges were combined to develop the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The assumption is intended to be a long-term assumption (30 to 50 years) and is not expected to change absent a significant change in the asset allocation, a change in the underlying inflation assumption, or a fundamental change in the market that alters expected returns in future years.
- (d) **Municipal bond rate:** The discount rate determination does not use a municipal bond rate.
- (e) **Periods of projected benefit payments:** Projected future benefit payments for all current plan members were projected through 2132.
- (f) **Assumed asset allocation:** The target asset allocation and best estimates of arithmetic real rates of return for each major asset class as of the most recent experience study are summarized in the following table. More recent arithmetic real rates of return may be available. While not relied on to develop the long-term expected rate of return, we believe that if more recent arithmetic real rates of return were used, the current long-term expected rate of return would still be reasonable.

| Asset Class           | Target Allocation | Long-Term Expected Real Rate of Return |
|-----------------------|-------------------|----------------------------------------|
| Domestic Equity       | 30.0%             | 5.90%                                  |
| International Equity  | 17.0%             | 7.14%                                  |
| Private Investments   | 15.0%             | 9.13%                                  |
| Real Assets           | 5.0%              | 4.03%                                  |
| Real Estate           | 9.0%              | 5.41%                                  |
| Core Fixed Income     | 15.0%             | 1.14%                                  |
| Non-Core Fixed Income | 6.0%              | 3.02%                                  |
| Cash                  | 3.0%              | -0.33%                                 |
| Total                 | 100.0%            |                                        |

**(g): Sensitivity analysis:** disclosure of the sensitivity of the net pension liability to changes in the discount rate. The following presents the net pension liability of the System, calculated using the discount rate of 7.30 percent, as well as what the System's net pension liability calculated using a discount rate that is 1-percentage-point lower (6.30 percent) or 1-percentage-point higher (8.30 percent) than the current rate:

|                                  | 1%<br>Decrease<br>6.30% | Current<br>Discount<br>Rate<br>7.30% | 1%<br>Increase<br>8.30% |
|----------------------------------|-------------------------|--------------------------------------|-------------------------|
| System's Total Pension Liability | \$7,657,860,605         | \$6,858,305,970                      | \$6,189,754,313         |
| Fiduciary Net Position           | <u>4,920,843,113</u>    | <u>4,920,843,113</u>                 | <u>4,920,843,113</u>    |
| System's Net Pension Liability   | \$2,737,017,492         | \$1,937,462,857                      | \$1,268,911,200         |

**Paragraph 80(a):** This paragraph requires the disclosure of the employer's proportionate share of the Collective NPL and if an employer has a special funding situation, the portion of the non-employer contributing entities proportionate share of the collective NPL that is associated with the employer. These amounts are shown in Schedule E.

**Paragraph 80(b):** This paragraph requires disclosure of the employer's proportion (percentage) of the collective NPL and the change in the proportion since the prior measurement date. The proportions are shown on Schedule D for all employers.

**Paragraph 80(c):** July 1, 2023 is the actuarial valuation date upon which the TPL is based. No roll forward procedures were used to determine the TPL.

**Paragraphs 80(d)-(e):**

***Changes in actuarial assumptions and other inputs:*** There were no changes to actuarial assumptions since the previous measurement date.

***Changes in benefit terms:*** There were no changes to the plan provisions since the previous measurement date.

**Paragraph 80(f):** There were no changes between the measurement date of the collective net pension liability and the reporting date. However, each employer may have unique circumstances that will impact the employer's proportionate share of the collective net pension liability. If there were changes that are expected to have an impact on the net pension liability, the employer should disclose the amount of the expected resultant change in the employer's proportionate share of the collective net pension liability, if known.

**Paragraph 80(g):** Please see Section V of the report for the development of the collective Pension Expense. Pension Expense for each employer is shown on Schedule E.

**Paragraph 80(h):** Since certain expense items are amortized over closed periods each year, the deferred portions of these items must be tracked annually. If the amounts serve to reduce pension expense, they are labeled deferred inflows. If they will increase pension expense, they are labeled deferred outflows. As noted in the previous section, the amortization of these amounts is accomplished on a level dollar basis, with no interest included in the deferred amounts. Experience gains/losses and the impact of changes in actuarial assumptions, if any, are amortized over the average remaining service life of the active and inactive System members at the beginning of the fiscal year. Investment gains and losses are amortized over a fixed five-year period.

The table below provides a summary of the collective deferred inflows and outflows as of the Measurement Date.

|                                                                          | Deferred Outflows<br>of Resources | Deferred Inflows<br>of Resources |
|--------------------------------------------------------------------------|-----------------------------------|----------------------------------|
| Differences between expected and actual experience                       | \$ 36,653,087                     | \$ 0                             |
| Changes of assumptions                                                   | \$ 28,104,180                     | \$ 121,038,544                   |
| Net difference between projected and actual earnings on plan investments | \$ 4,188,751                      | \$ 0                             |
| Total                                                                    | <u>\$ 68,946,018</u>              | <u>\$ 121,038,544</u>            |

**Paragraph 80(i):** The collective amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

| Deferred Amounts to be recognized in Fiscal Years Ending |    | Deferred<br>(Inflows)/Outflows of<br>Resources |
|----------------------------------------------------------|----|------------------------------------------------|
| 2025                                                     | \$ | (40,410,281)                                   |
| 2026                                                     |    | (111,112,211)                                  |
| 2027                                                     |    | 105,178,257                                    |
| 2028                                                     |    | (5,748,291)                                    |
| 2029                                                     |    | 0                                              |
| Thereafter                                               |    | 0                                              |

**Paragraph 80(j):** The amount of revenue recognized for the support provided by non-employer contributing entities for the participating employers is shown in Schedule E.

## **SECTION IV – REQUIRED SUPPLEMENTARY INFORMATION**

There are several tables of Required Supplementary Information (RSI) that need to be included in the System's financial statements:

**Paragraphs 81(a) and (b):** This information will be provided by the System.

**Paragraph 82:** Information about factors that significantly affect trends in the amounts reported in the schedules required by paragraph 81 should be presented as notes to the schedule.

***Changes of benefit terms:*** There have been no material changes of benefit terms in the past ten years.

***Changes of assumption and other inputs:*** The following changes to the actuarial assumptions were made as identified:

### **2022:**

- The discount rate was increased from 7.06% to 7.30%.
- The investment rate of return assumption was increased from 7.06% to 7.30%.
- The inflation rate was increased from 2.40% to 2.75%.
- Updated all mortality tables to the PUB-2010 tables for teachers.
- Updated the rates of retirement and termination.
- Updated the salary scale merit rates.

### **2021:**

- The discount rate was lowered from 7.34% to 7.06%.
- The investment rate of return assumption was lowered from 7.34% to 7.06%.

### **2020:**

- The discount rate was lowered from 7.50% to 7.34%.
- The investment rate of return assumption was lowered from 7.50% to 7.34%.
- The inflation rate was reduced from 2.50% to 2.40%.

**2019:**

- The Guaranteed Annual Benefit Adjustment (GABA) for Tier Two members is a variable rate between 0.50% and 1.50% as determined by the Board. Since an increase in the amount of the GABA is not automatic and must be approved by the Board, the assumed increase was lowered from 1.50% to the current rate of 0.50% per annum.

**2018:**

- Assumed rate of inflation was reduced from 3.25% to 2.50%
- Payroll growth assumption was reduced from 4.00% to 3.25%
- Investment return assumption was changed was reduced from 7.75% to 7.50%.
- Wage growth assumption was reduced from 4.00% to 3.25%
- Mortality among contributing members, service retired members, and beneficiaries was updated to the following:

- For Males and Females: RP-2000 Healthy Combined Mortality Table projected to 2022 adjusted for partial credibility setback for two years.

The tables include margins for mortality improvement which is expected to occur in the future.

- Mortality among disabled members was updated to the following:
  - For Males: RP 2000 Disabled Mortality Table, set back three years, with mortality improvements projected by Scale BB to 2022.
  - For Females: RP 2000 Disabled Mortality Table, set forward two years, with mortality improvements projected by Scale BB to 2022.
- Retirement rates were updated
- Termination rates were updated
- Rates of salary increases were updated

**2016:**

- The normal cost method has been updated to align the calculation of the projected compensation and the total present value of plan benefits so that the normal cost rate reflects the most appropriate allocation of plan costs over future compensation.

#### **2015:**

- Correctly reflect the proportion of members that are assumed to take a refund of contributions upon termination and appropriately reflect the three year COLA deferral period for Tier 2 Members.
- The 0.63% load applied to the projected retirement benefits of the university members “to account for larger than average annual compensation increases observed in the years immediately preceding retirement” should not be applied to benefits expected to be paid to university members on account of death, disability and termination (prior to retirement eligibility).
- The actuarial valuation should be updated so that the assumed rate of retirement for university members at age 60 is 8.50% as stated in the actuarial valuation report.
- The actuarial valuation should be updated to reflect the fact that vested terminations are only covered by the \$500 death benefit for the one year following their termination and, once again when the terminated member commences their deferred retirement annuity (they are not covered during the deferral period). Additionally, only the portion of the terminated members that are assumed to “retain membership in the System” should be covered by the \$500 death benefit after termination.

#### **2014:**

- Assumed rate of inflation was reduced from 3.50% to 3.25%
- Payroll Growth Assumption was reduced from 4.50% to 4.00%
- Assumed real wage growth was reduced from 1.00% to 0.75%
- Investment return assumption was changed from net of investment and administrative expensed to net of investment expenses only.
- Mortality among contributing members, service retired members, and beneficiaries was updated to the following:
  - For Males: 1992 Base Rates from the RP 2000 Healthy Annuitant Mortality Table for ages 50 and above and 1992 Base Rates from the RP 2000 Combined Healthy Annuitant Mortality Table for ages below 50, set back four years, with mortality improvements projected by Scale BB to 2018.
  - For Females: 1992 Base Rates from the RP 2000 Healthy Annuitant Mortality Table for ages 50 and above and 1992 Base Rates from the RP 2000 Combined Healthy Annuitant Mortality Table for ages below 50, set back two years, with mortality improvements projected by Scale BB to 2018.
- Mortality among disabled members was updated to the following:

- For Males: RP 2000 Disabled Mortality Table for Males, set forward one year, with mortality improvements projected by Scale BB to 2018.
- For Females: RP 2000 Disabled Mortality Table for Females, set forward five years, with mortality improvements projected by Scale BB to 2018.

***Method and assumptions used in calculations of actuarially determined contributions.***

The actuarial determined contribution rates are determined on an annual basis. The following actuarial methods and assumptions were used to determine contribution rates reported for the fiscal year ending June 30, 2023, which were based on the results of the July 1, 2022 actuarial valuation.

|                               |                                                                                                                               |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| Actuarial cost method         | Entry age                                                                                                                     |
| Amortization method           | Level percentage of pay, open                                                                                                 |
| Remaining amortization period | 25 years                                                                                                                      |
| Asset valuation method        | 4-year smoothed market                                                                                                        |
| Inflation                     | 2.75 percent                                                                                                                  |
| Salary increase               | 3.50 to 9.00 percent, including inflation for Non-University Members; 4.25 percent for University Members including inflation |
| Investment rate of return     | 7.30 percent, net of pension plan investment expense, and including inflation                                                 |

## **SECTION V – PENSION EXPENSE**

As noted earlier, the Pension Expense (PE) consists of a number of different items. GASB 68 refers to the first as Service Cost which is the Normal Cost using the Entry Age Normal actuarial funding method. To this is added interest on the TPL at the rate of return in effect as of the prior measurement date.

The next three items refer to any changes that occurred in the TPL (i.e., actuarial accrued liability (AAL) under EAN) due to:

1. Benefit changes,
2. Actual versus expected experience or
3. Changes in actuarial assumptions.

Benefit changes, which are reflected immediately in PE, can be positive if there is a benefit improvement for existing plan members or negative if there is a benefit reduction. For the year ended June 30, 2023 there were no benefit changes to be recognized.

The next item to be recognized is the portion of current year changes in TPL due to actual versus expected experience for the year. The portion to recognize in the current year is determined by spreading the total change over the average expected remaining service life of the entire plan membership. The remaining service life of active members is the average number of years the active members are expected to remain active. For the year ended June 30, 2023 this number is 10.73. The remaining service life of the inactive members is, of course, zero. The figure to use for the amortization is the weighted average of these two amounts, or 4.72. The development of the average remaining service life is shown in the table below.

### **Calculation of Weighted Average Years of Working Lifetime**

| Category                                                                 | Number<br>(1) | Average Years of<br>Working Lifetime<br>(2) |
|--------------------------------------------------------------------------|---------------|---------------------------------------------|
| a. Active Members                                                        | 19,975        | 10.73                                       |
| b. Inactive Members                                                      | 25,447        | 0.00                                        |
| c. Total                                                                 | 45,422        |                                             |
| Weighted Average Years of Working Lifetime<br>[(a1 * a2) + (b1 * b2)]/c1 |               | 4.72                                        |

The last item under changes in TPL is changes in actuarial assumptions. The portion to recognize in the current year is determined by spreading the total change over the average expected remaining service life of the entire plan membership, similar to the way experience gains and losses are recognized.

Member contributions for the year and projected earnings on the FNP at the discount rate serve to reduce the expense. One-fifth of current-period difference between actual and projected earning on the FNP is recognized in the pension expense. The development of the expected return on assets is shown in the table below.

The current year portions of previously determined experience, assumption, and earnings amounts, recognized as deferred inflows and outflows are included. Deferred outflows are added to the PE and deferred inflows are subtracted from the PE. Finally, administrative expenses and other miscellaneous items are included.

### Investment Earnings (Gain)/Loss as of June 30, 2023

|   |                                                |           |                     |
|---|------------------------------------------------|-----------|---------------------|
| a | Expected asset return rate                     |           | 7.30%               |
| b | Beginning of year market value assets (BOY)    | \$        | 4,724,449,484       |
| c | BOY Adjustment                                 | \$        | -                   |
| d | End of year market value assets (EOY)          | \$        | 4,920,843,113       |
| e | Expected return on BOY for plan year (a x b)   | \$        | 344,884,812         |
|   | External Cash Flow                             |           |                     |
|   | Contributions - employer                       | \$        | 113,441,533         |
|   | Contributions - non-employer                   |           | 48,437,855          |
|   | Contributions - member                         |           | 87,024,738          |
|   | Miscellaneous income                           |           | 55,137              |
|   | Refunds of contributions                       |           | (7,830,941)         |
|   | Benefits paid                                  |           | (429,121,173)       |
|   | Other Changes                                  |           | (313,704)           |
|   | Admin expenses                                 |           | (3,745,792)         |
| f | Total net external cash flow                   | \$        | (192,052,347)       |
| g | Expected return on net cash flow (a x 0.5 x f) | \$        | (7,009,911)         |
| h | Projected earnings for plan year (e + g)       | \$        | 337,874,901         |
| i | Net investment income (d - b - f)              | \$        | 388,445,976         |
|   | <b>Investment earnings (gain)/loss (h - i)</b> | <b>\$</b> | <b>(50,571,075)</b> |

The calculation of the collective Pension Expense for the year ended June 30, 2023 is shown in the following table.

| Pension Expense Determined as of the Measurement Date                                                               |                        |
|---------------------------------------------------------------------------------------------------------------------|------------------------|
| Service Cost                                                                                                        | \$ 95,850,764          |
| Interest on the TPL and Cash Flow                                                                                   | \$ 479,511,418         |
| Current-period benefit changes                                                                                      | \$ 0                   |
| Expensed portion of current-period difference between expected and actual experience in the total pension liability | \$ 6,063,782           |
| Expensed portion of current-period changes of assumptions                                                           | \$ 0                   |
| Member contributions                                                                                                | \$ (87,024,738)        |
| Projected earnings on plan investments                                                                              | \$ (337,874,901)       |
| Expensed portion of current-period differences between actual and projected earnings on plan investments            | \$ (10,114,215)        |
| Administrative expense                                                                                              | \$ 3,745,792           |
| Other*                                                                                                              | \$ 44,211              |
| Recognition of beginning deferred outflows of resources as pension expense                                          | \$ 88,510,206          |
| Recognition of beginning deferred inflows of resources as pension expense                                           | <u>\$ (58,756,574)</u> |
| Pension Expense                                                                                                     | <u>\$ 179,955,745</u>  |

\* Includes Miscellaneous Income of (\$55,137), other Pension & OPEB expenses of \$313,704, and other contributions of (\$214,356) not applied to employer allocations.

## **SCHEDULE A**

### **SUMMARY OF PLAN PROVISIONS**

#### **Effective Date**

September 1, 1937.

#### **Vesting Period**

Five years. No benefits are payable unless the member has a vested right, except the return of employee contributions with interest.

#### **Tier One Member**

A person who became a member before July 1, 2013 and who has not withdrawn the member's account balance.

#### **Tier Two Member**

A person who became a member on or after July 1, 2013, or who after withdrawing the member's account balance, became a member again after July 1, 2013.

#### **Final Compensation**

Tier One Members

Average of highest three consecutive years of earned compensation.

Tier Two Members

Average of highest five consecutive years of earned compensation.

#### **Normal Form of Benefits**

Life only annuity. All benefits cease upon death; however, in no event will the member receive less than the amount of employee contributions with interest.

## **Normal Retirement Benefits**

### **Tier One Members**

- Eligibility: 25 years of service or age 60 with five years of service.
- Benefit: The retirement benefit is equal to  $1/60$  of final compensation for each year of service.

### **Tier Two Members**

- Eligibility: Age 55 with 30 years of service or age 60 with five years of service.
- Benefit: A member age 60 with at least 30 years of creditable service will receive a retirement allowance equal to 1.85% of final compensation for each year of service. Otherwise, the multiplier used to calculate the retirement allowance will equal  $1/60$  of final compensation for each year of service.

## **Early Retirement Benefits**

### **Tier One Member**

- Eligibility: Five years of service and age 50.
- Benefit: The retirement benefit is calculated in the same manner as described for normal retirement, but the benefit is actuarially reduced by the lesser of the number of years equal to the age of the participant at early retirement subtracted from age 60 or the number of years of service at early retirement subtracted from 25 years of service.

### **Tier Two Member**

- Eligibility: Five years of service and age 55.
- Benefit: The retirement benefit is calculated in the same manner as described for normal retirement, but the benefit is actuarially reduced by the lesser of the number of years equal to the age of the participant at the early retirement subtracted from age 60 or the number of years of service at early retirement subtracted from 30 years of service.

### **Death Benefit**

|              |                                                                                                                                                                                                                                                                                                                                                                                                |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Eligibility: | Five years of service.                                                                                                                                                                                                                                                                                                                                                                         |
| Benefit:     | The death benefit is equal to $\frac{1}{60}$ of final compensation for each year of service accrued at date of death, with an actuarial adjustment based on the relation of the member's age at death to the beneficiary's age. A monthly benefit of \$200 is paid to each child until age 18. In addition, a lump-sum benefit of \$500 is paid upon the death of an active or retired member. |

### **Disability Benefit**

|              |                                                                                                                                                                                                                                                                                                                                                                              |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Eligibility: | Five years of service.                                                                                                                                                                                                                                                                                                                                                       |
| Benefit:     | The disability benefit is equal to $\frac{1}{60}$ of final compensation for each year of service accrued at date of disability. The minimum benefit is $\frac{1}{4}$ of the final compensation. A Tier Two Member is not eligible for a disability retirement if the member is or will be eligible for a service retirement on or before the member's date of determination. |

### **Withdrawal Benefits**

With less than five years of service, the accumulated employee contributions with interest are returned. With more than five years, the member may elect a refund of contributions with interest or leave the contributions and interest in the System and retain a vested right to retirement benefits.

### **Contributions**

Tier One Member: 7.15% of compensation. Tier One members are required to contribute a Supplemental Contribution equal to an additional 1% of compensation. The Board may decrease the Supplemental Contribution if the average funded ratio of the System based on the last three actuarial valuations is equal to or greater than 90% and the period necessary to amortize the unfunded liabilities of the System based on the most recent actuarial valuation is less than 15 years. Following one or more decreases in the supplemental contribution the Board may increase the supplemental contribution to a rate not to exceed 1% if the average funded ratio of the System based on the last three annual actuarial valuations is equal to or less than 80% and the period necessary to amortize all liabilities of the System based on the most recent annual actuarial valuation is greater than 20 years.

Tier Two Member: 8.15% of compensation. The Board may require a Tier Two member to contribute a Supplemental Contribution if the average funded ratio of the System based on the last three actuarial valuations is equal to or less than 80% and the period necessary to amortize the unfunded actuarial accrued liability is greater than 20 years and a State or employer contribution rate increase or a flat dollar contribution to the System has been enacted which is equivalent to or greater than the Supplemental Contribution Rate imposed by the Board. A single Tier Two Supplemental Contribution Rate increase cannot exceed 0.5% of compensation and in total cannot exceed 9.15% of compensation. The Board may decrease the Supplemental Contribution if the average funded ratio of the System based on the previous three annual actuarial valuations is equal to or greater than 90%; and the period necessary to amortize the unfunded actuarial accrued liability is less than 15 years.

Employer: 9.96% of compensation. Employers are required to contribute a supplemental contribution equal to 1% for fiscal year 2014 and increase by 0.1% each fiscal year through 2024. The Board may decrease the Employer Supplemental Contribution if the average funded ratio of the System based on the last three actuarial valuations is equal to or greater than 90% and the period necessary to amortize the unfunded actuarial accrued liability based on the most recent valuation is less than 15 years and the GABA has been increased to the maximum allowable. Following one or more decreases in the Supplemental Contribution Rate the Board may increase the Supplemental Contribution Rate to a rate not to exceed 1% if the average funded ratio of the System based on the last three actuarial valuations is equal to or less than 80% and the period necessary to amortize the unfunded actuarial accrued liability is greater than 20 years.

MCA 19-20-604 specifies that the employer contribution rate will be reduced by 0.11% when the amortization period of the System's UAAL is 10 years or less according to the System's latest actuarial valuation.

State Supplemental Contribution: \$25 million per year on an annual basis payable on July 1<sup>st</sup> of each year.

Re-employed Retirees: Each employer is required to contribute 9.85% of total compensation paid to all re-employed TRS retirees employed in a TRS reportable position. This amount shall increase by 1.00% for fiscal year 2014 and increase by 0.10% each fiscal year through 2024 until the total employer contribution is equal to 11.85% of re-employed retiree compensation.

**Interest on Member  
contributions**

Effective July 1, 2023, the interest credited on member contributions increased from 0.25% to 4.00% per annum.

**Guaranteed Annual Benefit  
Adjustment (GABA)**

On January 1 of each year, if the retiree has received benefits for at least 36 months prior to January 1 of the year in which the adjustment is to be made, for Tier One Members, the retirement allowance will be increased by 1.5%.

For Tier Two Members, the retirement allowance will be increased by an amount equal to or greater than 0.5% but no more than 1.5% if the most recent actuarial valuation shows the System to be at least 90% funded and the provisions of the increase is not projected to cause the funded ratio to be less than 85%.

## **Schedule B**

### **STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS**

The assumptions for investment return, price inflation, wage inflation, mortality, retirement and withdrawal have been updated to reflect the experience study for the period ending July 1, 2021 adopted by the Board on May 3, 2022.

The current asset valuation method was adopted for the July 1, 2007 valuation.

Tables B-3 through B-5 give rates of decrement for service retirement, disablement, mortality, and other terminations of employment.

#### **Actuarial Cost Method**

The actuarial valuation was prepared using the entry age actuarial cost method. Under this method, the actuarial present value of the projected benefits of each individual included in the valuation is allocated as a level percentage of the individual's projected compensation between entry age and assumed exit. The portion of this actuarial present value allocated to a valuation year is called the normal cost. The normal cost was first calculated for each individual member. The normal cost rate is defined to equal the total of the individual normal costs, divided by the total pay rate.

The portion of this actuarial present value not provided for at a valuation date by the sum of (a) the actuarial value of the assets and (b) the actuarial present value of future normal costs is called the UAAL. The UAAL is amortized as a level percentage of the projected salaries of present and future members of the System.

#### **Records and Data**

The data used in the valuation consist of financial information; records of age, sex, service, salary, contribution rates, and account balances of contributing members; and records of age, sex, and amount of benefit for retired members and beneficiaries. All of the data were supplied by the System and are accepted for valuation purposes without audit.

#### **Replacement of Terminated Members**

The ages at entry and distribution by sex of future members are assumed to average the same as those of the present members they replace. If the number of active members should increase, it is further assumed that the average entry age of the larger group will be the same, from an actuarial standpoint, as that of the present group. Under these assumptions, the normal cost rates for active members will not vary with the termination of present members.

### **Employer Contributions**

At the time of this valuation, the total employer contribution rate for normal costs and amortization of the UAAL was 11.96% of members' salaries. The employer contribution rate will increase by 0.10% each year beginning July 1, 2014 until the total employer contribution rate equals 11.96%.

### **Administrative and Investment Expenses**

The investment expenses of the System are assumed to be funded by investment earnings in excess of 7.30% per year.

### **Valuation of Assets - Actuarial Basis**

The actuarial asset valuation method spreads asset gains and losses over four years. The expected return is determined each year based on the beginning of year market value and actual cash flows during the year. Any difference between the expected market value return and the actual market value return is recognized evenly over a period of four years. The actuarial value of assets is not allowed to be greater than 120% or less than 80% of the market assets. (Adopted effective July 1, 2007.)

### **Investment Earnings**

The annual rate of investment earnings of the assets of the System is assumed to be 7.30% per year net of investment expenses, compounded annually.

### **Interest on Member Contributions**

Interest on member contributions is assumed to accrue at a rate of 4.00% per annum, compounded annually. This assumption was set as of July 1, 2023.

### **Postretirement Benefit Increases**

Tier 1 Members:

On January 1 of each year, the retirement allowance payable is increased by 1.5% if the retiree has received benefits for at least 36 months prior to January 1 of the year in which the adjustment is to be made.

Tier 2 Members:

On January 1 of each year, the retirement allowance payable is assumed to increase by 0.5% if the retiree has received benefits for at least 36 months prior to January 1 of the year in which the adjustment is to be made.

### **Future Salaries**

The rates of annual salary increase assumed for the purpose of the valuation are illustrated in Table B-2. In addition to increases in salary due to merit and longevity, this scale includes an assumed 3.50% annual rate of increase in the general wage level of the membership. The merit and longevity increases for the MUS members did not show a pattern of increasing or decreasing with service at the time of our most recent study. Therefore, the MUS members have a flat 0.75% merit and longevity assumption. The general wage increase assumption and merit and longevity scales were adopted May 2022.

Montana University System (MUS) members are assumed to have a 0.63% higher average final compensation to account for the larger than average annual compensation increases observed in the years immediately preceding retirement.

### **Service Retirement**

Table B-3 shows the annual assumed rates of retirement among members eligible for service retirement. Separate rates are used when a member is eligible for reduced benefits, for the first year a member is eligible for full benefits, and for the years following the first year a member is eligible for full benefits. The rates were adopted May 2022.

### **Disablement**

The rates of disablement used in this valuation are illustrated in Table B-4. These rates were adopted May 13, 2010.

### **Mortality**

A written description of each mortality table used in this valuation is included in Table B-1. These rates were adopted May 2022.

### **Other Terminations of Employment**

The rates of assumed future withdrawal from active service for reasons other than death, disability or retirement are shown for representative ages in Table B-5. These rates were adopted May 2022.

### **Part-Time Employees**

The valuation data for active members identify part-time members. For part-time members earning more than \$1,000, total credited service is adjusted based on the ratio of actual earnings to annualized earnings. The liability and normal cost calculations for these members are based on the adjusted service and actual earnings for the prior year.

Part-time members earning less than \$1,000 during the last year were valued at their current member contribution balance.

### **Montana University System Retirement Program (MUS-RP)**

MUS-RP payroll as of June 30, 2023 was \$288,172,574.

Effective for fiscal years after June 30, 2007, the MUS-RP contribution rate is 4.72%, pursuant to MCA 19-20-621. It is our understanding the contribution will not stop unless legislative action is taken.

### **Buybacks, Purchase of Service, and Military Service**

The active liabilities and normal cost (excluding liabilities and normal cost in respect of Return of Employee Contributions) were increased to 100.5% of their original value to fund this additional service based on a study of the System's experience for the five calendar years 1995 through 1999. Effective July 1, 2008.

### **Probability of Marriage & Dependent Children**

If death occurs in active status, all members are assumed to have an eligible surviving spouse and two children. The spouse is assumed to be the same age as the member. For members who die prior to age 50, dependent children are assumed to be eight years old. For members who die after age 50 but prior to age 55, children are assumed to be 13 years old. Members who die after age 55 are assumed to have no dependent children under the age of 18.

### **Records with no Birth Date**

New records with no birth date are assumed to be 25 years old. Records that are not new and have no birth date used the same birth date as the prior year's valuation.

**Table B-1**

**Summary of Valuation Assumptions**

|                             |                                                                                                                                     |           |

**Teachers' Retirement System  
State of Montana**

**Note to Schedule of Employer and Non-Employer Contributing Entity Allocations (Schedule D) and Schedule of Pension Amounts by Employer and Non-Employer Contributing Entity (Schedule E)**

In accordance with GASB Statement 68 (the standard), for the purpose of financial reporting, the amounts and percentages in Schedules D and E will be utilized by each employer of the System to present their proportionate share of liability and pension amounts associated with the employer's participation in the Teachers' Retirement System (TRS). The schedules were prepared by Cavanaugh Macdonald Consulting, LLC; however, the report and schedules herein are the responsibility of TRS management.

The Schedule of Employer and Non-Employer Contributing Entity Allocations (Schedule D) displays the proportionate relationship of each employer to all employers and each employer's allocation percentage. Secondly, Schedule D displays the proportionate relationship of the non-employer contributing entity (The State of Montana) to all employers and the non-employer contributing entity's allocation percentage. Third, Schedule D displays the amounts and percentages of the overall non-employer contributing entity's contribution that is associated with each employer. Lastly, Schedule D displays all the allocation percentages described above for the measurement year (2023) as well as the previous year (2022) and the difference in the allocation from year to year (Change in Proportion).

The allocation percentages in Schedule D are derived based on actual normal employer contributions and non-employer contributing entity contributions made to TRS during the measurement periods (FY 2022 and FY 2023 normal employer contributions and non-employer contributing entity contributions). Contributions other than normal employer contributions (termination pay contributions, working retiree contributions, buy back contributions, and in some cases MUSRP supplemental contributions) are not included in the allocation calculation but instead are included in total contributions and reported as deferred outflows/inflows of resources. There is a small amount of employer contributions that cannot be attributed to any specific employer due to timing differences. These employer contributions are utilized to reduce the Pension Expense of the system and therefore allocated to each employer equally. Employee contributions are also utilized to reduce the collective pension expense of the System.

The Schedule of Pension Amounts by Employer and Non-Employer Contributing Entity (Schedule E) displays the various pension amounts, as of the measurement date (June 30, 2023), allocated to the employer and non-employer contributing entity. Some amounts are allocated to the employers and non-employer contributing entity based on the allocation percentages calculated in Schedule D. These amounts include each employer's proportionate share of the Net Pension Liability, the deferred inflows and outflows of the system, the proportionate share of the Pension Expense, the proportionate share of the non-employer contributing entity's Net Pension Liability, the non-employer contributing entity deferred inflows and outflows of the System, and the proportionate share of the non-employer contributing entity's Pension Expense. Some amounts in Schedule E are calculated in a more involved manner according to the standard. These amounts include the Change in Proportion & Difference Between Employer Contributions and Proportionate Share of Contributions of the employer and non-employer contributing entity, and the Total Pension Expense of the employer and non-employer contributing entity.

As stated above, the deferred inflows and outflows of the System are allocated to each employer based on the allocation percentages calculated in Schedule D. These inflows and outflows of the System are calculated per the standard and include the Difference Between Expected and Actual Experience, the Net Difference Between Projected and Actual Investment Earnings on Pension Plan Investments, and the Changes of Assumptions. These deferred inflows/outflows of the System are recognized over time in the Pension Expense of the System per the standard. The amounts not recognized in the current measurement period (FY 2023) are recorded as deferred inflows/outflows of the system and allocated to employers. Therefore, each of these deferred inflows/outflows of the System incorporates several years' worth of information to comprise the totals.

At the employer level, the difference between total employer contributions (including normal contributions, working retiree contributions, termination pay contributions, buy back contributions, and in some cases MUS-RP supplemental contributions) and the amount of the employers proportionate share of the total contributions for the System are recognized in pension expense according to the standard. The amount not recognized in the pension expense is reported as a deferred inflow or a deferred outflow of resources for each employer according to the standard. The change in the employer's allocation percentage from year to year is also recognized in pension expense according to the standard. The amount not recognized in the pension expense is reported as a deferred inflow or a deferred outflow of resources for each employer according to the standard. These two categories are combined in Schedule E and reported in the columns labeled Change in Proportion & Difference Between Employer Contributions & Proportionate Share of Contributions.

At the system level, Schedule E displays total Change in Proportion & Differences Between Employer Contributions & Proportionate Share of Contributions as a deferred outflow of resources in the amount of \$63,922,027 and total deferred inflow of resources in the amount of \$63,922,027 due to Change in Proportion & Differences Between Employer Contributions & Proportionate Share of Contributions. These amounts offset each other therefore they do not impact the collective deferred inflows of resources and deferred outflows of resources for the System as a whole. This phenomenon is reported in a separate row totaling the Collective Pension Amounts of the System at the end of the schedule. This total does not include the \$63,922,027 in deferred inflows and outflows as they are not part of the collective pension amounts of the System.

The amounts in Schedule E allocated to the State as a non-employer contributing entity are included in the Total All Employers & State amount at the end of Schedule E. The State's (Non-Employer Contributing Entity) totals are displayed on a separate line total for clarity. Lastly, as stated above, the Collective Pension Amounts of the System are also displayed at the end of Schedule E.
